

Danvers, Apr. 18, 1914.

Dr. George Kennedy,
Readville, Mass.,
My dear Dr. Kennedy:-

The Danvers Historical Society has in contemplation the preservation of the Col. Jeremiah Page house on Danvers Square, for permanent headquarters. The plan is to move the house to the Society's lot on Page street, furnish it in the style of the Revolutionary period and build a concrete addition in the rear for the museum and auditorium. The land upon which the old house now stands has been sold for business blocks, and the house must be removed before June 1st. If not used for historical purposes, it is to be torn down, according to court decree.

As one of Miss Page's old friends, we wonder if you would be interested to assist in keeping intact this old landmark. The cost of moving the house and restoring it is estimated to be about \$1,500, \$500 of which is to be paid to the Page heirs as a purchase price. The fireproof addition will cost several thousand more, but of course we do not expect her friends to be interested so much in that.

This Society will have to solicit funds to promote the work, but it has faith not only in its own members but in the general public that sentiment will be strong enough to produce the needed funds.

If you think of any other of Miss Page's friends who would be at all interested, will you kindly pass the word along?

Very truly yours,

(Mrs) Harriet S. Papley,
Secretary.

4 Peabody Ave.

1-31-93

Dear Dr Kennedy

I must not longer
delay fulfilling my
promise to Mr. Dingle to
write and tell you that
he expressed regret at
not being able to see
more of you, and to have
~~also~~ had an opportunity to
talk with you about the
plants you collected in
Canada. But he felt
himself under the restraint
of obligations that made
him not master of his
own time and he expressed
a fear that he might not
have given you ~~the~~ much
attention as he ought to have

done. He regretted also
that he could not make
time enough to get out
to see you.

I was unable myself to see
him long enough to get all
the information that I wanted
about his ferns. But with
a large undistributed collection
awaiting his return home he
felt obliged to hurry back.

I want also to apologise
myself for the hurried
postal which I sent to you.

I was very busy when the
thought of it came into my
mind, and I sent it off
almost mechanically without
a thought as to how I was
doing it.

I have been so very busy that
I have not yet had time to

select out the ferns & papers
which I have for you
but I hope to get or them
before very long.

Very Truly Yours
George Engelmann

8 Camille Place
Boston

Sept 4/94

Dear Dr Kennedy

I am troubled
about the form I called
Boottii yesterday. The
more I think of it the
more I believe that it
should be only Cristatum.
I will remember that I
hesitated about it, but as it
seemed to be unusually
perulate, and I did not
have my glasses on, as I
should have done, concluded
to refer it to Boottii, tho'
not as a good typical form.
I think now it will be
better not to do that but
to call it Cristatum.

Cristatium is often strongly serrated but Boottia spines be larger, ^{much} broader at the upper half of the frond than the lower, and more spinulose in the serrations, like *Spinulosum*. Good typical Boottia used to grow plentifully on Purgatory Swamp, Dedham, if you ever drive there.

Kindly let Mr Williams know, as I think he took a specimen of the *Cristatium* and ask him to let me see the form of *Marginalia* he told me about, as soon as convenient as I want to get my notes on the new form ready for publication as early as I can.

Very Truly Yours
George Engelmann

Dear Dr

I am unable to place
the little fern positively, and think
it will be well to send it to
Dr Hooker as your suggestion.

I shall be interested to learn the
result

Yours Truly

G. G. KENNEDY,

READVILLE, MASS.

DEAR SIR: --

I NOTE YOUR CORRESPONDENCE IN THE RECENT NUMBER OF THE RHODORA AND I THOUGHT POSSIBLY THAT YOU MIGHT HAVE SOME FLOWERING PLANTS FOR EXCHANGE. IF YOU HAVE I SHOULD LIKE TO MAKE SOME EXCHANGES WITH YOU AT ONCE, AS I EXPECT TO GO TO CENTRAL AMERICA IN JANUARY. MY SPECIMENS ARE ALL NAMED WITH DATA AND LOCALITY AND FROM THIS STATE AND I SHOULD EXPECT THE SAME FROM YOU. I WOULD NOT CARE FOR ANYTHING BUT NEW ENGLAND PLANTS, PERMITTING ME TO SEND YOU AS MANY AS I HAVE OF MY OWN SELECTION AND YOU TO RETURN AN EQUAL NUMBER OF YOUR OWN SELECTION. I PRESUME I HAVE ONLY BETWEEN 75 AND 100 SPECIMENS. LET ME HEAR FROM YOU AT ONCE.

YOURS RESPECTFULLY.

CHAS. C. DEAM.

DICT. E. P.

ans Oct 14 that I collected
only New Eng. plants for
my Herb. Referred him

Mr. Dr. Geo G. Kennedy
Readville, Mass.

My dear Sir:

Your favor from
March. 7. received. I am very
obliged to you, that you are trying
to collect some *Buxbaumia aphylla*
for me. I have only a fraction
of a single plant and am happy to get
some good specimens.

The little *Leucina Valdiviana* Phil.
I have just from Mr. Prof. Walter Dean
last Autumn. I never observed this
species here - but perhaps I may
find it in the ponds & swamps of
the N. Western part of Mo.
If agreeable to you I shall collect
in the coming season the different

Remains of my region.

Sincerely
Yours truly

C. H. Duesterhoef

ms.
Cinna Mo. 14 March 95.

Mr. Dr. Geo. G. Kennedy
Readville, Mass.

Dear Sir:

Many Thanks for the
fresh Material of *Burbaumia*
aphylla L., which reached my Table to
day. I am very glad to see this
interesting little plant in living
state! It seems to me, that the
best host for *Burb. aph.* is a *Collared*.
Where this lichen covers the ground of
the patch you kindly sent, there are
the *B.* surely. Please see, if that
is not so.

I send you in exchange good
specimens of

Bruchia flexuosa C. M.,
Aphanorrhagma Saevata Sull.
Orthotrichum stragulatum T. Br.

Very truly yours
C. Y. Demetrios.

counted exact), 2000.
books - too being quite
worth while - so I am
trying to fix them for
future disposal -

So you know there
are two things that
now

disturb me - two
letters of Father's
after your return
home - he just says
"we are all made
up our minds that
we should be happy
in the May house -
take down the fence
between us - would
you like that?" Oh
how I should have
"liked" it - his next
letter

204 "you never say
a word about my
plan of the May
house - did I
did I ever? It
is years since I have
read all my letters
of those sad years -
Florence. There - love
and now I cannot
get this thought from
my mind -
The other

When Nurse Wardwell
left - Huntington for
Boston that day - did
I or did you give
her sum for a meal
en route -

I have ^{not} been well
since Sunday - the
great heat and
change hurt me -

Now must write

NIGHT THOUGHTS.

When in the night, my thoughts flow out to thee,
Suppressed by day, through cares' restricted bond.
Oft I arise, that thou may'st truly see
What depths of love I bear to thee so fond.
Love like mine, e'en selfish though it be,
In loving thus itself in other form,
Brings peace, and joy, and all that comforts me,
And heaven's clear light succeeds the blinding storm.
Dear boy, did we no painful trials know,
E'en joys too would ne'er o'erflow the heart.
Clouds in the summer sky that lower low,
By contrast, show heaven's blue a thing apart.
How seasons know, if all like garb they wear?
How heart's joy know, but from the soul's despair?

Katherine B. Rand.
Sept. 1898. 4'o'clock a.m.

Newtonville, Jan. 17. 1902.

Dear Dr. Kennedy,

For Mrs. Drew &
myself, I thank you for
your kind note. We
are so "full up" that we
can make no excursions
— delightful as it would be
to go to you at Readville—
till after next Wednesday.

Then we'll let you know
and arrange to go out
and see you and take
lunch with you if it

is quite convenient for
you to have us do so.

I'll write again.

Meanwhile - with very
kind regards to Mrs. Kennedy
and Miss Mildred and the
others at home - I am

Yours sincerely,

E. B. Drew,

Cambridge -

Thanksgiving Day.

1906

29 Nov

Dear Dr. Kennedy,

We got back
nicely last Sunday, as Sir-
clair no doubt reported - on
his return from here the
same evening. What a very
good time we had! How
delightful our talk over the
cigars - I am sure we could
have gone on two hours
more at least - there's no
dearth of topics! There are
several

several men in my class
and a good few in yours
that I must ask you about
some time. I wonder if you
didn't know my distant
cousin - and boyhood's playmate -
Elisha Dillingham Bangs?

Our talk made us miss
the trophoea. But some
day I'll surprise Mildred by
dropping in & begging a concert
of her!

Our kindest messages to
Mrs. Kennedy and to the rest
of the family - including
her cake walk dancer.

My "boxes" are come from
China - and when we
open them I shall particu-
larly want to show you
my Wan-min San: it's
a big gay umbrella bestowed
by my Chinese staff at
Fochow as a good will
& good bye offering. The
words mean

Myriad people's Umbrellas -

Yours very truly,

E. B. Drew.

Lucy's right was quite
O.K-ious (not pie-K-ious) on
Monday morning!

48 Garden Street,
Cambridge, Mass.
5 February 1915.

Dear Dr. Kennedy:

Most kind of you to send me the
Class Book of '64. I shall read it
to-night with genuine delight. I
remember so many of the men of that
year; and the book will enable me to
clear up some confusion of mind between
your classmate^d and the men of '65 and '66,
who were in college with me.

Sinclair is a good neighbor! The
other day he sent me a cutting from the
Springfield Republican ^{about} ~~about~~ my article
on Sir Robert Hart. What a good fellow
he is,- and Rachel, too.

With renewed thanks I am, as ever

Yours very sincerely,

E. B. Drew,

Dr. George G. Kennedy.

Jan. 30, 95.

Dear Sir,-

I have read with interest your note on Buxbaumia aphylla. L. in the Jan. Terr. Bulletin. I write to see if you can spare me a few capsules for my collection. I enclose a few plants from Ithaca, collected within a stone's throw of the University Campus. The plant is pretty widely distributed here, but I have never found it so abundant as you mention.

yours very truly

Elias J. Durand.

sent him fresh specimens Bux.
10 Mch 1895 -

36 Eddy St., Ithaca ny.

Feb. 10, '95.

Dear Sir,-

I thank you very much for the specimens of *Leucina valdiniana* which you sent. I regret very much that I have no specimens of the species from the south or west. If I had them I should be glad to send them to you. I shall be pleased to receive specimens of *Buxbaumia aphylla* whenever you may be able to procure them.

Yours very truly

Elias J. Durand.

Cambridge, Mass.
Dec 30-1883.

Dear Mr. Kennedy -

When Barnes was receiving subscriptions for the Gray Memorial, a letter would come every once in a while announcing an enclosure of 25 cts or more - but no money. I used to laugh at it and now the laugh is turned against me. I found yr trip ticket in my pocket after I had mailed yr letter. I met N. L. Britton at the Garden this p.m. He has published The Flora of N. J. and has made a revision of the genus *Pcleria*.
Sincerely yr. Walter Deane.

Cambridge, Mass.
Dec. 30 - 1885.

Dear Mr. Kennedy,

We reached Cambridge
safely Monday evening in one
hour and a half from your
house and we all agreed
it was one of the most
charming social and botan-
ical visits we had paid
for a long time. The
ticket-office, as you anticipated,
was closed. Thanks for your
thoughtfulness. I find two
rides left, & I return them
as I am afraid I cannot

use them in Cambridge -
Give my kindest regard
to Mrs. Kennedy and your
daughter and Hal -

I saw all the Botanical
Society at the Garden yes-
terday, including Rev. Mess.
Moore, from Ashland, who
dined with me. He is
an authority on Botany -
Tons and makes water plants
a specialty. His Herbarium
includes all No. Amer. plants,
as he expresses it, from the
Arctic circle to the Tropics.

Sincerely yours,

Walter Greaves.

Cambridge, Mass.
Jan 9-1886.

My dear Mr. Kennedy,

This year certainly botanists seem to "hibernate" here. J. M. Coulter has arrived and is staying with Barnes near by. I was at the Garden this P.M. and there were Dr. Gray and Messrs. Watson, Bailey, Barnes & Coulter a goodly assemblage to be among. Winter has come at last, and your "pussy" willows must put their heads back again. The Cornus certainly does

grow in Plymouth and I should
like to go down for it, if it
is possible. Our Botanical
Boxes are progressing.

The *Lelogyella* I got on
Blue Hill has discharged
its macrospores copiously,
and I have collected them
in a paper pocket.

Bailey is preparing a Synopsis
of the Caries of N. A.
for publication. It will be
a useful work. He is
well up in the Subject.

Sincerely yrs.

Walter Deane.

Cambridge Mass.
Jan 31-1886.

Dear Mr. Kennedy.

I am afraid I have ^{been} a little negligent in answering your letters. I have received two or three since I wrote last. Everything is progressing volcanically. I am not putting much in my Herbarium just now, though I occasionally receive a few choice things. I had sent me yesterday a fine specimen of *Scelopendrium vulgare* with the rootstock, a thing I appreciate. I have already a good collection of the genus *Salix*, a tough one is it not? There is only one man in this country who really knows the genus and he is going to furnish the genus for Gray's Syn.

Gray says
this note

Sincerely M. W. Allen & Gray
over work

70. No. Amer. I did him a little
service a while ago by doing some
tracing for him and he is going
to supply my "deliberata" in West
Texas corn. His name is M. S.
Bebb of Ill. Then I have sent
my deliberata of Mich. plants to
a botanist of note in Mich. a
friend of Bailey and the rest of the
botanical fraternity here and we
will send me a good many -
So the wheel keeps rolling. Did
I tell you I had at last got
2 autograph letters of Horace Mann
from H. W. Ravenel of Aiken S. C.
Bailey is grinding on Carex, Berberis &
the Mosses, & Compton's the Bot. Gaz. on
Hypericaceae. Bailey goes a week from
15-movers. The next stay. We must arrange
a little later for a meeting again, as
soon as there is a little more leisure
You take the Drugs & Medicines of Lloyd Bros.
I believe. The last no. is a good one -
Drop a line occasionally. Oh our boxes are
getting on finely. Tell me how your *Verbascum*

10-30 A.M. Feb 17

Dear Mr. Kennedy -
Excuse this primitive way of
writing. I believe
Prof. W. H. Bailey, Jr.
Michigan Agricultural Experiment Station
Michigan

When you have had a chance,
visit the Ryeby district. Later
I am to have the papers in 3 of
my rooms changed. They are now in
large as usual, but still in a
bother - There are not any more
Diagrams of Earth's position about which
I can purchase, are there?

Dr. Gray has just received a new
edition of the 2 Synoptical Tables
of the Cosmos in one Volume, with
corrections made on the plates, where
was possible, and a Copernican Supplement
- (price \$5.00). He gave me a
copy of the Supplement, and he had
it made off separately. Excuse the
paper & ink for it. Even
W.D. Greene.

✓ 7. 7. 1880. 547-

1880/1881

Dear Mr. Kennedy -

I was delighted in no measure when I heard of your coming trip South and I only wish I could have seen you before you went. I have been very busy this week and have just finished work now at 11 P.M.

A merry, merry time to you all and may you get rid of that troublesome cold of your own. Think of your old friend occasionally when you see some fine representative of the Southern States. I have serious thoughts of taking my wife out to Europe for a week to visit some new friends of ours. It would do us both much good -

But it is uncertain -

Can't you drop me a very
short line before you go and
let me know your plans -
I have had pleasant letters
from Bailey & Mr. Morang
lately -

Get good sorting specimens of
the Pinguiculas - They are
small and very easy to press.
You will find 8 species - You
should get the yellow Sarcocolla
too. Y^e

Sincerely yrs.

Walter Deane.

Thursday Even -

- Jan. 31 -

Cambridge Mass.
May 2-1888.

Dear Mr. Kennedy -

I cannot frame any sentence that will convey to you the delightful time I have passed with you and Hal during the past week. It has been one of the pleasantest trips of my life and certainly it has been unique in every way. From the dome of the Capitol through the Natural Bridge to the bowels of Luray is an adventure I certainly never dreamed of experiencing until your kindly spirit

prompted you to take me.
Actions speak louder than words
and I think a certainly, I
trust that I showed you
during our trip how much
I was enjoying myself.
In reaching Boston, I luckily
met a friend from Cambridge
on an train who had a
carriage from Cambridge to
meet him and ^{we} went out
together. I reached home
thunk and all by 9-15 A.M.
Mrs. Deane was glad enough
to see me. Almost the first
thing we did was to change
clothes and really I have a
great many plants. I had
no idea of it. I found two
letters from Bailey on Carex.

McCarthy's bundle from Washington
is here 56 species of Mammals
plants; good & choice specimens
among others, Dionaea in flower.
I have a grass sent me from
Springfield to verify. I en-
closed you a notice I received
from Patterson you may be
interested in. He is a good
man, friend of Dr. Gray. I
have subscribed for one
copy. I haven't seen
it yet. Must read
Henry VIII - Give kindest
regards to all. My flowers
were not in very good con-
dition. Ever yrs
N. Deane.

Cambridge, Mass.,
May 11-1856.

Dear Mr. Kennedy -

Well, well, you told me
that your movements were very
uncertain and now I quite
believe it. So you are off
for Europe in a month.
What a fine time you will
have. I must see you again
before then certainly. I will
send the tin to Brewster.
He is in Concord now. All
my Virginia plants are dry
except one or two. As soon
as possible, I shall go over
them carefully and name
them all. I will let

you know the results. I
have been verifying McCarthy's
plants lately and I find
lots of errors. Stupid ones too.
I shall let him know. Saw
Barnes this P.M. He is all right.
Got some Spirogyra on Sunday.
It is beautiful to see. No
conjugation however. Have you
sent your books to L. F. Ward?
I wrote him the other day. An
interesting sketch of the Lundy &
Nat. Bridge Flora in the last
Ton. Bull. The idea of going
to Europe. Not much botan-
izing for you. Let me
hear particulars sometime.
Sincerely yours
Walter Deane.

Dear Mr. Kennedy.

I have gone over carefully
all our Va. plants, except the
Carices and have verified them all.
I will give you a list of those
over which we had some doubt.
I had good types to compare them
with in every case except the *Morus*
& *Senecio* -

Arabis laevigata -

Phlox divaricata -

Quercus ~~Michx.~~ *Muhlenbergii* Eng. (= *Q. Pri-*
mus, var. *acuminatus*)

Morus rubra -

Viola tricolor, var. *arvensis* -

Senecio aureus, var. *obovatus* -

Nepeta & *Glechoma*

Viola cucullata, var. *cordata*

Viburnum prunifolium

Though I feel very sure about the
Senecio, I shall take it to the Garden.
I have the var. *Balsamitae* which
differs much from our plant.

McCarty made lots of mistakes
in his names. He sent me 5
species of Sabba'tias and 4
were wrongly named. Good
night. It is quite late.
Oh, what delightful memories
still linger of our trip.

Sincerely yrs.

Walter Deane
Cambridge, Mass.

May 12-1886.

May 24-1886

Dear Mr Kennedy - Cambridge Mass

I was so sorry to find
your card and to have been out.
It was a shame. This P.m. after
School, I took the train to Somer-
ville and got some more *Tussilago*
Farfara. I had got it in flower
and fruit and I wanted some of the
young leaving shoots. After digging
in the hard clayey soil for over
half an hour I succeeded in getting
some specimens with the leaving
shoots attached to the old stock.
From there I walked home -
Stopping at the Garden at just
4 P.m. I saw them all, including
Barrows who said that you
had been there and left your
card at which we were sorry
not to have seen you -

What brought you out here?
Hal says you have been to
Lebanon. Tell me about it.
Did you "steal awhile away" and
find anything in the woods.
I have put in press elegant
specimens of *Asplenium* (Haydeni
ana & cinnamomea. I got the
rootstocks of both. They are
huge, as big as your two fists,
and required much sectioning and
washing. I have put in also stam-
inate specimen of *Quercus bicolor*
ilicifolia & *alba* and a few things.
I haven't had time to prepare the Va.
plants. That is really winter work.
Barnes and I want very much to
make a very formal party call at
your house as soon as we can.
Give my kindest regards to your family.
I have got nice specimens of *Carex*
remyi loaning. Sincerely yours W. Deane.

Dear Mr. Kennedy -

Very glad to hear from
you and to get an account of
your Lebanon trip. I never
saw *Waldestenia* growing.
I am afraid we shall have
to defer our visit to you till
next week as we work on re-
ports Saturday and if I
came on that day it would be
very late in the afternoon -
We can arrange a day later
though, for next week. I shall
be glad to see Milton and its
attractions once more -
Sincerely yrs.

Cambridge, Mass.

May 26/88.

Walter Deane.

20 Boylston St.
May 29-1886

Dear Mr. Kennedy —

If you can take the
9-15 A.M. train from the
Fitchburg Depot to-morrow,
Sunday morning, the 30th,
next, you will have a
fine day with Churchill,
Barnes & myself botanizing.
Get a ticket for So. Acton.
Take your lunch in your
rucksack. We shall go
if the weather is poor
but shall go Monday.

Sincerely yrs
W. Deane.

1-15 P.M.

Dear Mr. Kennedy.

Unless something unexpected turns up, we will come out on next Sat. if that is perfectly convenient to you. You will let me know when the trains go out. We had a fine tramp Sunday and got *Thaspium aureum* - *Calla palustris*, *Cypripedium pubescens* - *Lilix tristis*, *Castilleja coccinea*, *Carex vestita*, &c. Were very sorry not to see you though I hardly expected it - Barnes did not go -

Sincerely yrs

W. Deane.

Wed. A.M. 7-15.

Camb. Mass.

Camb - Mass - June 7-1886.

The Carex by York Pond is
C. digitalis - rather young.

The Carex in the Swamp on
the right of the road as we
were driving is *C. canescens*.

The Carex covering your land
is *C. panicea* a good thing.

If you have a spare half
here, cant you get me
about a dozen of these
beauties near the house?
Would there be any chance of
there being left at the school?

I know Bailey would like
some of them - If too much
trouble, why, leave it. Had
a most delightful time at
yr. house, Sat. as I always
have. Sincerely yrs. W.D.

UNRECORDED

POSTAL CARD

Rolling but the address to be on this side.

Mrs. S. S. Kender

Peedville,

Mass.

- The Pines -

Cambridge Mass
June 10 - 1856.

My dear Mr. Kennedy -

The *Carex* arrived safely this A.M. and I think you were very kind to send it. I rather hesitated after writing you, considering that you were leaving so soon. They are fine specimens and, all washed up, make a splendid show. You were very generous. I put in press 30 specimens. I shall send a good many of them to Bailey.

So you are on the briny deep - dear me - I can't realize it. I only trust you will have a good voyage and a most delightful summer. I shall more certainly drop a line occasionally and inform you of my doings. I will take care of your *vasculum* till you return - I received a letter

If you get any *Clay. detritis* (*Bellio perenni*) get me a specimen.

from Pebb yesterday enclosing Carey
Richardson a very rare and
valuable ledge. He also sent me
a cross-curve. Bailey has come
Carey formosa for me so
now I have all but 12
of the Man. Carices. Some of these
were mere waifs found once and
really don't count for anything.
Tell Hal that all but the
College boys are to be let off
on the 16th June. Give my kindest
regards to all your family.
Tell Miss Edith that I haven't
forgotten my trip through Europe
and shall look forward to a
continuation of it in the fall.
Barnes will probably leave here
by the end of June. Alas for
me. He is a fine fellow.
He will publish soon an artificial
Key to accompany Leveque & James
Manual of No. Amer. mosses.

Sincerely yours, Wallace Peckham

Cambridge Mass.
(June 23-1886.)

My dear Mr. Kennedy,

So you are now all safely
across the water and already en-
joying the many pleasures of
England. Where you are, of course,
I can only guess. You thought you
might be some little time in Wales,
so I suppose that, of course, you
are not there, but, perhaps, are
wandering about in Scotland -
You are enjoying a great deal, I well
know, wherever you may be. Give my
very kindest regards to all the family
who I always imagine are having
a jolly bright time. - In regard
to my poor self, I am about as
busy as mortal could well be -
What with school examinations
and sporadic turns at my
herbarium, I scarcely know where
I am. Yesterday I corrected 28

History papers and to-day 24 French papers, besides
those of my Botany class. Then I have made
one or two short botanizing trips and got some
very nice things - *Plant. maritima*, *Hottonia inflata*,
Euphorbia Esala, *Stellaria graminea*, *Fragaria*
vesca, *Anchangelia atropurpurea*, *Antennaria Stelli-*
riana &c. - In my presses are pretty full. Then
last evening & this evening I have mounted 75
sheets including some of our Virginia. They are
very handsome when mounted. I have sent to
Bailey 25 specimens of *Carex panicula*, including
a good number of the fine specimens you
sent me. I have also collected and pressed and
sent him 23 specimens of *Carex conoidea* and
17 of *C. stricta*. He is finding all sorts
of nice *Carexes* round about his college.
Barner's wife & mother leave here in
less than a week, June 29. Barner stays
a week & a 10 days longer.
Class Day comes in two days. I presume
I shall go about a little with Mrs. Deane.
But July 1st is my longed-for day for
then work stops for the summer.
There was a fine display of Roses, Orchids
and Strawberries to-day, at Horticultural
Hall. Strawberries are very abundant just
now. I look forward with pleasure
to a line from you when you get
a chance to write. Mrs. Deane sends
her kindest regards to Mr. Kenney &
yourself. Sincerely yr.
Walter Deane.

Mr. L. Bebb - Bentley has re-
turned from Minn. and is now
back in Lansing - He will
give me an account soon
of his Trip - It is a good
chance here to collect seaside
phaenogams - I guess I shall
have all I can find, but
I shall find many interesting
plants no doubt. To-morrow
I shall visit a salt-
marsh near by - The ocean
rolls in, within almost
stone's throw of the house
here. It is very beautiful.
Give my kindest regards to
all your family - When do
you return? As late as pos-
sible. I doubt not -
Sincerely yrs. Walter Deane

Rye Beach, W. M.
Aug. 8 - 1886,

My dear Mr Kennedy.

Your letter of July 24th
from Grindelwald was joyfully
received - Oh! what a fine
time you are having. I some-
times wonder at your enthusiasm
over those stunning views -
I have followed ^{you} in spirit
from Lucerne in the steamer
to Stansstad through the
narrow pass, into the Alp-
nack ^{see} and then through
Larnen, Pruning, Brienz to
Interlaken - How grand a sight
to see the two Glaciers that
give such a reputation to
the place at Grindelwald -
And then the flower - well, it

would do for me to say any-
thing, as I know nothing of
it all. Thanks for mentioning
my name occasionally at
sight of some lovely plant.
I received your letter just before
leaving Cambridge and didn't
have time to look up your
enclosed plant. It is an
Umbelliferous plant of some
kind, with a very pretty in-
volute.

We came down here yesterday
and stay through Aug. I
haven't been very far from
Cambridge this summer and
have had a good opportunity
to collect a number of our
plants that I wanted:
Taraxacum officinale, *J. Greenii*,
Bidens Beckii, *Eleocharis pygmaea*,

Scirpus subterminalis, *Najas*. &c
The other day I went botan-
izing with Mr. Moray, our
authority on *Potamogetons*.
We spent a whole day on
Concord River among the
aquatics. I learned a good
deal and collected some
very nice things, among others,
5 or 6 species of *Potamogetons*.
Mr. Moray spent 2 nights
with me. In Sept., I am
going up to Ashland and
Mr. M. is going to give a lot
of *Potamogetons*. You see I
get all I can from these
specialists. I have just
received from Bailey a
package of *Carex* and a
number of *Salix* named by

for on Sat. Aug 7, we go
to Rye Beach for ^{two} weeks
where my sister is. Alas, I
have given up Buffalo for
various reasons. I think a
month of sea bathing and
exercise will be better for me
than staying in Cambridge
and then going to Buffalo
in all the heat. My wife
fully approves of it, though
I so hate to give it up.
Saw Dr. Gray twice yesterday.
He has revised the Viola
and gone over my set some
50 sheets, besides giving me
a lot more nice ones.
Mr. Watton is well. He has
been spending a few days
at the Isles of Shoals -

Cambridge Mass.
Aug 1 - 1886,

My dear Mr. Kennedy -

I guessed at your leaf
as soon as I saw it and hit
it rightly. It is Ruscus Hy-
poglossum (Butcher's Broom).
Don't you remember in Gray's
Practical Botany he devotes a
section to Cladophylls.
What you sent me is a flat-
tened branch consisting of two
^{inter} nodes. The small appendage
at the node is a bract in the
apex of which the flower ap-
pears though there is none on
this specimen. It is very
interesting. This particular
species is a native of S. Europe.
R. aculeatus is a native of England

I was glad enough to get yr.
letter from Lucerne. It gives
me a whiff of foreign lands
and makes me feel as if I
were not so very far from
its beautiful lake & the
famous Lion. Are the ducks
still swimming in the little
pond below the Lion?

Yes! I should enjoy puzzling
over these botanics and
wrestling with some of these
flowers. Do you found our
little friend Asplenium. Give
him my respects, pray and
tell him I shall perhaps
call on him some time, though
it may be to his detriment.

Well, I am enjoying every
~~the~~ moment of my time, no

matter where I am. I had a
charming visit at Bell's, Me.
at my uncle's and made a
very pretty collection. *Juncus*
Balticus & *Greenii* *Glaux ma-*
ritima *Spergularia media*
were all abundant, including
the very interesting *Ruppia*
maritima. By the end of
June I had pressed and
labeled & mounted 200 sheets
including a collection of Southern
Manual plants sent me -
Yesterday & today I have
pressed a large number of
specimens collected since
and I shall get them
along as far as possible
before the end of the week.

deal on your beads looking
out for your large family -

Churchill has gone to
Willoughby for a short time
alone to recollect his last
year's plants. I shouldn't
like that.

Give my kindest regards to
all your family with my
best wishes for their safe
return. Pray don't forget
me entirely, as I shall
most surely call on you
in the fall. I shall ^{most} ~~not~~ ^{not} ~~not~~
give for this I scrawl, though
I have written rapidly.
Sincerely yr.

- Walter Deane -

He has looked over my collection
of Concord Roses and I have
one *R. Luncilis* at which I
am very glad. I have one
puzzler that he will work
up later. Rev. Thos. Mearns
comes down from Ashland
and spends the night with
me Tuesday and the next
morning we go to Con-
cord to investigate the
new Nuphar in Concord River.
Mr. Mearns has just published
a revision of the genus in
the Bot. Gaz. which is very
interesting. He makes a new
species and I have found
it in Concord River.
We shall meet Mr. Edw. Hoar

and go out on the river in his boat.

Bailey writes me from the wilds of Minn. by a camp fire. He is botanizing hard and will bring back a valuable set of plants from that hitherto but little explored region. I have shown him up sets of a number of *Caricea* ~~traces~~ since that *C. panicum* - *C. bullata*, *oligotricha*, *aculeata*, *muricata*, *tentaculata*,

Barnes is in West Va. apparently having a good time. I had a long letter from him lately.

Mr. J. J. Greenough, one of our teachers, has recently be-

come engaged to Miss Noble daughter of Mr. F. W. Noble who, you know, teaches in Boston. All are much pleased at it.

I found yesterday on the rubbish heap in Cambridge an immense *Dipsacus sylvestris*, from which I took specimens. It must have been 8 ft. high. I also found a most remarkable composite flower (*Echinops*) each head consisting of a single floret. This is like a compound leaf consisting of but one leaflet as in the *Barberris vulgaris*, Orange &c. You certainly have a good

to all the family -
I presume you enjoy
the comforts of your
house more than ever.
I hope to see you
soon -

Sincerely yr.

Walter Deane.

Cambridge, Mass.,
Sept. 25, 1886.

Dear Mr. Kennedy -
Welcome home to
America to Massachusetts
to Milton! I have
been watching the
papers and yesterday
I saw that the Sa-
vonia had arrived
while the name of
Kennedy occupied about
two lines. So I knew
that you are all safe

once more. I shall see
Hal to-morrow and I
shall make him, as
usual, my mail carrier.
I shall want to
learn of your passage
home and of all the
good times you have
all been having.
I have the consolation?
of being ahead of you
in one thing. I have
already poisoned,
labelled and mounted
over 500 sheets. That

means some work. I am
glad enough that I didn't
leave it, ~~that~~ after term
had begun. I have
now comparatively little
more of that sort of
work to do. My Virginia
Caries turned out to be
very good ones. Cary
Caryana, platyphyllo,
Torta &c. I don't re-
member whether you took
any. I remember you
laughed at me for
taking so much.
Give our kindest regards

Cambridge, Mass.,
Oct 9, 1886.

Dear Mr. Kennedy

I have, it seems, never been
so busy as during the past week.
I have meant to write you more than
once but at the last moment I would
dash off a line to Mr. Churchill who is
now on the decided mend and it would
be then late. I want to tell how much
I value my *Lis. lens* which is a
little beauty. I tested it with some
slides I have prepared, one, especially
of *Burnes*, a ~~correct~~ vertical section of
a *Lichen* showing gonidia, etc. &c and
I was delighted. I have succeeded this
week in distributing a good many sheets
through my Herbarium. My *Cyperaceae*
are getting well represented, 67 sheets of
Juncus, all the genus *Cyperus* but one
species, that is of the *Man.* Yesterday
P.M. I went up to Fresh Pond and
found *Potamogeton perfoliatus* in
fine fruit. ~~Have~~ only low. How are
your Alpine plants. Don't forget
the *Hickories*. When the *Castanea*

ENVELOPE

Mr. Geo G. Kennedy,
Readville,

Mass.

The River.

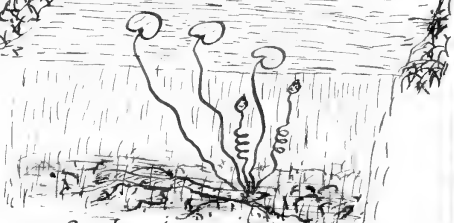

U. S. PATENT OFFICE, WASHINGTON, D. C.

Two and a half acres! I'm 9 now
asking a great deal? 9 place for trees
take a run to Concord in 1877 and
see Mr. Thayer. He is a beautiful
day- 9 has meant to work at
home but 9 can't think 9 ought to
be. Priscilla 99
Mellen Deane.

Dear Mr Kennedy -

Myriophyllum verticillatum
Nymphaea odorata, both in fruit
were the fruit of my Exp
to Concord yesterday. Mr. Hoar
& I spent 3 hrs. on the River
lazing about and peering into the
deep. The *Nymphaea* fruit in a
very interesting manner, but a
hard find and something de-
strays it.

The spiral
stem in
fruit is a
singular
occurrence

reminding me of the *Vallisneria*.
I got a few other things not rare.
Good fruit of *Rosa rubiginosa* from
the same bush from which in early
July I got flowers &c. When you
get to your Nat. Bridge Plants I
can help you about labels as I
have in my diary every name with

The latest authority. Excuse mine
as it is late.

Sincerely yrs.

Walter Deane,

Cambridge, Mass.

Oct 10 - 1866

Cambridge Mass.
Oct. 20 1886.

Excuse the mistake
of turning over two
pages at once - W.D.

My dear Mr. Kennedy -
I haven't written you a
line for some time. First,
thanks for the fruit you sent
me. Another year we might get
full specimens, staminate in the
spring a summer and fruit later
with leaves - Bartley writes
me that he sent you his
Carex Synopsis to "Rever,
Milton, Mass." He says it
should have been Readville,
and he wants me to let you
know that you may get it.
You probably have it now
though, as once I sent a

card at the same address
and it reached you a little
late.

I have boxed and mounted
Jacob's bundle, making 89
sheets, about 75 being *Palmeri*.
a fine lot. I have also put
in my Herb. some 19 sheets
from Churchill from Cory,
Pa. some very good things.
Linnæa glauca, *Stellaria longi-*
folia, *Phlox divariata*, *Oxyc-*
tricha &c also red fruit of
Rosa blanda from Villavieja,
Bailey has sent me a

little book he has just
published on Apple Culture.

I am. I am feeling rather
poorly lately on account of
a bad cold that has been
very persistent. The storm
and horse-cars have not
improved it. Still I think
it is disappearing now.
I have just run up a
stunning map of the U.S.
West of the Missouri -
Government Survey -
Have just received Dudley's
Cayuga Flora a fine piece
of work on the flora of
that region; kind regards
to all. Sincerely yr.

Walter Deane.

Dear Mr. Kennedy.

I haven't heard from you for some time. My botanical work slowly progresses. Bailey's Ser. of Caricac have arrived. They are fine, about 60 species with printed labels. You should have them all from Lancaster, No. Minn. Cambridge, Milton & Rye Beach. Had a nice letter from Barnes today. The way's you have never answered his last letter. I get about 2 letters a week from Bailey. He has sent me a box of his No. Minn. plants, I shall have to poison now with a vengeance. Mr. Watson has returned, well and brown. Had a long letter today from Lloyd. Their business

delays The Drugs & Medicines.
I send you that bit of Muscari
I promised - Let me hear
from you. Barnes & Coulter
~~are~~ doing me up a bundle
of plants. I have, at last,
sorted all of those letters
Ward gave me. I have
quite a collection now.

Kind regards to all

Ever yours

W. Deane,

I hope Sinclair is coming
out of that cold all right.

(Cambridge,

Nov 22.

8.30 P.M.,

Bailey wrote me a letter
from Mich. dated June 23rd 1866

Dear Mr. Kennedy

I had a delightful
time at your house Friday.
Sat. B.M. I poisoned about
50 shoots of Bailey's Prairie
Plants and in the evening
went over a bundle of Grasses
received from Dr. Vasey. He
named the 30 species of Texan
Grasses I sent him and sent
me 50 species of U.S. Grasses.
A valuable addition. I have
got the plants poisoned Sat.
in the mounting box, and have
spent the rest of the time
binding my thin pamphlets into
covers. I have sorted and laid

Excuse mine it is late.
I send you my picture for
inspection. Ever yrs W. Deane,
Dec 6 -

Dear Mr Kennedy -

I have been trying for a week past to write to you - Mr. Morong is coming down next Monday Dec. 27th. He will get to the Gardens early and I shall go there to work too. At somewhere between one & two o'clock we return to my house to lunch. Then Mr. Morong generally retires with me to my Herbarium. He has come plants for me and I shall try to give him some duplicates for an English correspondent of his. Now can you come down and go to the Garden and meet us and then come to the house and we'll all have a nice chat and you will meet Mr. Morong? He returns home by about 4 P.M. and if you can stay on later I shall be happy - I have mounted since I saw

you about 200 sheets and have
just put into my mounting box
nearly 100 sheets of 9 crosses
which I have lately printed.
Would you mind telling Har-
ring my diary to school, ~~for~~
on Wed. In I shall need it
in making out labels for those
duplicates. You shall have it
again if you desire. I feel
quite flattered at your desire
to read it. I heard from
Bernes lately. I read Henry
P. to-morrow evening. So you
see I am busy enough -
Sincerely yours

W. Deane,

Monday evening

- Dec 20 -

That label of
Bible's ^{for}
Camp ^{clips} should
be "Lampy ^{clips} ^{clips}."

Cambridge

Mass.

Jan 10-1887

□ P.M.,

Dear Mr. Kennedy -

I must write a very short time
to say that my thoughts often turn natural-
wards, even if I have not written - How we do
often our time is to be filled up. I hear constantly
from Bailey and at intervals from Barnes.
Yesterday I received another package from the former
chiefly Caries. He reports the mercury as
having reached 38° below, slightly fine - He
is pushing a bill for \$8000 through the Legislature
for a building and apparatus for his use at
the College. Prof. Trelease is here in Cambridge
I called on him yesterday - very agreeable in
deed & full of knowledge. I am putting a
little microscopic botany into one of our boys -
using my old instrument. I am getting a
better one through Barnes. He are studying
cellular tissues now. It is very interesting -
I have over 100 sheets of *Violas*, and all but 8 of
the Mass. species of *Campylocarpus* is Bailey. I enclose
one of Bell's character in the letters. Com. W. Deane.

$$\begin{array}{r}
 2z + 0 + 0 + 2y \\
 a - x - y - 6 + x - y + 0 + 2y \\
 \hline
 -6 + x - y - 6 + x - y - 2
 \end{array}$$

that I shall enjoy the
cracking whenever it comes
off - I should have enjoyed
Dawson's lectures, and I had
time to attend them -

I am doing nothing extensive
in microscopy, but I do want
to know the elements of
things, and get a connected idea
of the anatomy of plants -
The fibro-vascular system
in stems, leaves, roots &c
is not easy - My poor microscope
however shows me already parenchyma
collenchyma, fibres, crystals, starch
grains, sclerenchyma, bundles,
stomata, &c, fairly well.
H. N. Patterson's bill for his new
check-list has arrived. I pre-
sume the book will be out soon.
Give my kindest regards to all
your family - I enclose you
Walter Deane.

Cambridge Mass.
Jan 16-1887

My dear Mr Kennedy -
I was quite overpowered
by your New Year's greeting
and your nice long letter.
The "Hawthorne" does most ac-
curately recall pleasant weeks
in Concord, both socially and
botanically - Many thanks -
Dear me, I haven't received
such a sleeping down for a
long while - Asprella, Asprella,
The name is not so mysterious
after all - In naming my
Grasses, I naturally follow
Dr. Geo. Vasey's "Grasses of the
U.S." as I follow Bailey in

Genes, Murray in Potamogeton,
hill in Dechen, Britton in
Cyperus Gray in Astia & Soli-
dago, &c. &c. Now in Vasey's
"Flora of the U.S. Special
Report, No. 63. Depart. of
Agric. 1883", and in Vasey's
"Descriptive Cat. of the Grasses
of the U.S. 1885", both of
which find for Dr. Vasey,
if you have them n.c.,
you will find that *Euphrasia*
Willd. has superseded *Gym-
nostichum*, Schum. So, our little
Meadow Rue (*Thalictrum anemo-
noides*, formerly *Anemone thalictroides*)
is now neither one nor the other,
but *Anemonella thalictroides*,
Vide Bot. Gay, Vol. XL p. 39.

There is it all right?
Have I given enough names at you in return
for this record?

I saw Trelease yesterday and
London and he will be de-
lighted to dine with you any
time. You will like him very
much. But will it be
just as convenient for us to
come either on Friday or Sat-
urday, instead of Wed.?

I am always very busy in
the middle of the week and
especially so this week as
our Shakespeare Club meets
Tues. evening and I have the
minutes to make out and
notices to make out on Wed.
Either evening would suit me
and it would suit Trelease.
If you get out to the Garden
to-morrow you will see him
and arrange. I needn't say

The characters of the fruit don't
species read very much, but
they don't work so well in
the specimens. I have the
3 parts of the Canada Flora,
fine work - Did you never meet
Penhallow? I like him very much.
Bailey is well and hard at work.
He sent me lately *Carex glauca*.
I enjoy my microscope immensely.
When I feel up to it, I
shall have a $\frac{1}{8}$ objective, a
nose piece & movable stage -
You know I can't possibly duplicate
that Clematis section of yours. It
does illustrate so many nice things.
They don't sell any more slides at
the Educational Supply. Thank you
very much for the Loan - I will
return by Mail - Have written today
to Barnes, Bailey, Lloyd, Knowlton,
Forster (for an article) and the Southern Science.
Kind regards to all W. H. Cane.

Cambridge Mass.
Feb. 20 - 1887.

near to a disaster makes
one shudder and think how

I am so sorry about your cold. How is it?

quickly any one of us may
be taken away - I don't
mean to be gloomy about it
but it does make one think.
You will have much to
recollect, as indeed you always
do, and I am looking
forward to some of Mrs.

Kennedy's amusing stories
when I see you all again.
I have been business personi-
fied. I am working on the
Histology of Goodale's Book and
am in constant correspondence
with Barnes, asking him lots
of questions - Not that I
accomplish very much, but
I am getting a very good
idea of it all. I think I can

help anybody who knows nothing
of the subject, to get a good
clear idea of the primary and
secondary structure of roots from
Goodale's Book. Barnes' letters
are invaluable. Then Barnes
calls on me to trace and copy
this & that at the Garden and so
he says we are quits -

All my Fern-plants are now
in my Herbarium, the first
time for a year - I rejoice.
Knowlton sent me from the
National Museum lately their
Genus *Stemodia* (including *Montelia*)
to verify. It rather startled
me at first, but I worked
at the Garden all yesterday P.M.
and shall send them back
to-morrow. It is hard genus
especially 2 species - Vide
Bot. Gaz. Vol. 1 - page 47 & 48.

Cambridge, Mass -
Mar. 18 - 1887.

My dear Mr. Kennedy -

It is now some time since letters have passed between us, though I hear from you constantly through Hal. We have both been under the weather, I should judge. My cold has run for just a month now. It is however on the mend and I trust you are over yours. My Herb. has been increased of late by 100 sheets of Grasses from Scribner. I mounted them all in 3 sittings. I have had but little time to work with my microscope, but I have made several glycerine mounts. The sections are not first-class, but they are just as good for practical purposes. I went over to the Garden yesterday P.M. and worked up a couple of San Diego plants sent me by my brother.

Mrs. Goodale gives a dinner for Dr. & Mrs. Gray to-morrow evening. I was much pleased to be invited. There will be present Dr. & Mrs. Gray, Prof. Farlow, Prof. & Mrs. A.B. Ley, Mrs.

Prof. & Mrs. Goodale and your humble ser-
vant with his wife - Seymour is an
Illinois man, who makes a specialty
of parasitic fungi - He is here
assisting Dr. Farlow in some literary
work - I am working now at in-
tervals in distributing my duplicates
that have accumulated during the
summer - It is considerable work as
my duplicates are arranged in bun-
dles, having been crumpled out of the
shelves - I had a letter from
Barley, a day or two ago. He is well
and very hard at work - He lectures
every day on the Science of Horticulture.
I have also heard from Barnes. He
too is busy enough, but well -
Let me hear from you - Give my
kindest regards to all - Trelease
is busy all the time - I haven't seen
him since last Sunday - He has
got the Revision of the Gramineae
ready for press - I wish you could
see his free hand drawings of leaves,
fruit & seeds - They are beautiful -
Sincerely, yr.,

Walter Deane.

Cambridge, Mass.
May 4-1858.

Dear Mr. Kennedy ~

I never should have been so egotistical as to have had these extra copies reprinted, but it is all my uncle's doings ~ He wanted a number and I had none and so he made me do it. Please accept one ~ I have made quite a number of small corrections here and there inserting date of birth at the beginning page

I trust you will find a
small corner for it.
Please send in by Sinclair
to-morrow. The authority
for the genus Lepigonum
from your Genera Planta-
rum. I feel sure it
is Fries. Long letters
from W.W. Bailey, L.W.
Bailey jr, & Mrs. M. L. Owen

Ever
W. Deane

Cambridge Mass.
July 6 - 1890

Dear Dr. Kennedy:

You are quite right
as to *Carex vestita* -
I am glad the ques-
tion came up in my
mind, as I shall
make the mistake again.
The old Manual says
C. vestita externally re-
sembles *C. lanuginosa*,
but I now see the
difference in the perigynia.
I never got *C. vestita*
so old and it lead me off.

I had a fine time yesterday as I always do. If you are at home, can't you wait for fruit of Galium verum? Remember fruit of Utricularia vulgaris and Utricularia sagittaria.

We shall probably get off by the middle of the week.

I reached home yesterday at 9.15.

Ever
A. Deane

He had shipped off 5 boxes
of plants is W. G. and
now was waiting for the
steamer to sail from
Santiago to Chile.
He knows much of his
letter to the revolutionary
state of all the govern-
ments in So. Amer.

Kindest love to one
and all of yr family.
Mrs Deane will now
walk 4 m. without
minding it.

Ever

J. Deane

Jaffrey St. H.
Sept. 10-1890.

Dear Dr. Kennedy:

It is enough to get
you. of Sept. 1 from W.
Lebanon. You must have
enjoyed meeting Prof. Joseph.
I sent him a small
list of plants this spring
that he helped he might
secure for me - Fruit
of *Cicuta bulbifera* is a
very good thing. Has
it abundant? I have
some from Michigan -

Hope you had a nice time
on Mt. Washington. Did you
gather in many herbs?

Well, day after day glides
by here and we return
next week the 18th.

I have lately been
putting some obstacles
in press for Mr. Bell.

By the way, pray
look carefully at the
Sagittaria natans,
var. (?) *gracillima*.

You should find fruit
about now. Lately a

bird sent me for a number
a plant from Chas. H. H.
St. Albans. It was
a specimen of *gon-*
istia - *astaria* and
said he had not
a single fruit in
fruit! This not long
ago - so look!!

I have just had another
letter from Mr. Moray.
I think I told you
of the one of June 18th
written on his return
to Asuncion - This one
is dated July 25. Bears the

I have had a very
bad cold in two
weeks. It is going
away now -

I am looking for-
ward to the Christ-
mas recess with
the greatest pleasure.

I forget to enclose
with your board
the band -

Sincerely
Walter Deane

Cambridge, Mass.
Dec. 15th 1892.

Dear Dr. Kennedy,

I was glad to
get you. of Dec. 7th.

I am now getting
a large package
from Washington
into my Herbarium.
They are a fine lot of
Western plants. Through
my exchanges, I have
been able to check
off from my desiderata

list, this Fall, 108
plants. That counts
flown & fruit separately.
It is encouraging to
see my list grow
smaller.

J. A. Allen spent
the evening here yester-
day consulting me
in regard to that
Chick-Led. It will
be very nice indeed.
I for one ^{shall} find
it very useful. It
is exactly what I want.

I have had a pleasant letter
lately from A. W. Bailey. He is
flying about, collecting. His letter
was from Indianapolis. He seems
to be quite well and strong.
Mr. Bailey's health is improving, and
he is going to Georgia for the
winter. The winter element of
disease does not agree with him.

7. P.M.

Cambridge Mass.
Oct. 14-1894.

Hello, Hello! I got home
all right, my dear G.
Wednesday, at 10.20 P.M.
I had time was expended in
getting home how. So in my
opinion, the rain partially held
up, and I must have, and
could have taken my first home,
and passed, or my little -
if it could be any more convenient
it was to take it or fix my
and send it over to me by railroad
at my expense, I can take it
at all right. Of course I was
not ready in the slightest way
about it. Yesterday was the 13th
to the 12th as I told you, and
and time we had. I am not
satisfied, almost all things, I
don't think many collect, many
of them. I didn't take it.

[illegible]

Cambridge -

Sept 29/95.

Dear Dr. Kennedy -

Delighted to hear
from you and so
pleased that you speak
so kindly of the plate.
As to the merits of its
execution if it, there
is of course no question.
What do you think,
Mr. Dring has sent
me fine flowering and
fruiting *D. nudicaulis*.
I don't see how I
should ever own it.

Oh, I have so much to
tell you! Think of being
in a swamp of at least
half an acre solid of
Lygodium palmatum. Such
a sight have I seen.

I hope to see you soon.

I have plenty of Herb,
work ahead —

L.H. Bailey wants very much
a few clusters of *Vitis*
Labrusca to photograph.

I can't find any — Perhaps
you may —

Love to all —

Sincerely

Walter Deane

It is hard to get any information -

I explained to my class to-day the morphology of the pistil, how each carpel is an infolded leaf. Then we analyzed *Apocynum* and I then realized the beautiful structure of the flower before. The two ovaries with a common round stigma ~~is~~ showing a close connection with *Asclepiadaceae* -

Much love to all at home - Baily W.W. writes from Conway, Mass.

Coville's paper on Crimson Clover Hair Balls in good. Just had the clover sent me from Nantucket -

Ever truly
W. Deane

Taffrey N.H.
Aug 5-1896.

Dear Dr. Kennedy -

Excuse this horrid paper but I have it and must use it up - Yrs of the 3rd was welcome of course - I am so glad that Mrs. Briggs is getting on so nicely and hope that soon she will quite her old self. I will recast *C. muricata* and *Phyma* - Should so like to meet you and the Foxons. I send you in mail a little box containing two mosses - I want

The names. They were just
sent to me to-day from
Nantucket. My friend thinks
the Sphagnum is *S.*
squarrosum which is the
common species there.

She thinks the other is a
Leucobryum, *L. glaucum*,
perhaps. You see I refer
to the great Bryologist.
Drop me the names when
you write again -

Dr. Robinson is here and
I spent part of this
morning with him. He
is glad to be here and
rest. He must mean
rest mentally, for to-morrow

morning he starts with his
wife and tramps from his
house to the summit of
Monkshead through the
woods, and up over the
cliffs. I confess it
would be too much for
me.

L. H. Bailey writes from
Savannah, Ga.! How he
soothes about.

I asked the Park
Commissioners why they
tore out the front page
of the Flora. The only
reply I got was that
they did it at the order
of Clinton, Clinton & Clinton.

BEGAN AS A "PRODIGY"

Eventful Stage Career of Madge Kendal.

**Her Home Life Is Happy, and She Is
Mother of Five Children.**

**House of the Kendals in Portland Pl. Is a
Model of Comfort.**

No actress ever came to America, with the possible exception of Sarah Bernhardt, who has held public interest as has Madge Kendal.

A matronly and attractive woman in private life, she stirred up a breeze of criticism in her presentation of "The Second Mrs. Tanqueray," and the merits and faults of her impersonation have been widely discussed.

Mrs. Kendal is a fine type of the handsome and robust English woman. She is the mother of five children, and is said never to be happier than when with them at her beautiful home in the fashionable precincts of Portland pl., London.

Her first appearance as an actress may be stated to have taken place July 29, 1865, when she was seen as Ophelia at the Haymarket in London. Her first appearance in America was in the fall of 1889. She was seen in Boston Dec. 9 of that year, at the Hollis street theatre.

The successive tours of the Kendals have made them rich, and they now devote themselves more than ever to their family, which consists of two sons and three daughters. Mrs. Kendal was often approached when in this country by persons who asked her how she kept her superb vitality when playing so many difficult roles for weeks at a time.

To these inquirers, she made this statement: "The Genuine JOHANN HOFF'S MALT EXTRACT has helped me considerably to keep my strength. I consider it the best nutritive tonic and table beverage I know of." And in Mrs. Kendal's handsome London home the tonic made by Johann Hoff had a conspicuous place on the sideboard.

whom he has just gone away for the long and delightful Mediterranean trip on the Fuerst Bismarck. As the president of the Flint & Pere Marquette railroad and of the Wamsutta mills corporation at New Bedford, Mr. Crapo has large business responsibilities, but they have never weighed heavily upon him. He inherited wealth from his father, he made a fortune in the practice of the law, which was greatly enhanced by his successful prosecution of the Alabama claims and his life was happy enough until the sudden death of his most estimable wife three years ago. They had been associated all their lives, having been playmates in childhood, and the blow was one for which there could be no compensation or consolation in the lapse of time.

John Tyler, whose death was recorded last week, was rather a notable figure in Washington for some years after he took up his residence there in 1882. His life was not a fortunate one, although he began it with every advantage. As the private secretary of his father where the latter succeeded William Henry Harrison in the presidency, his early associations were such as to favor a successful career, provided he had had the requisite ability, but this he did not possess. He was always a man of literary tastes, and he served during the Mexican war and afterward, on the confederate side, during the war of the rebellion. His course in turning Republican after the close of the civil war, cut off his opportunities for a public career in his own state. John Jay's career was also an obstacle to his success in early life. When he was finally provided with a treasury clerkship by President Arthur he became a prominent advocate of total abstinence and the "Sons of Jonadab," as the Washington society of "Don't-Drinkers" is called, had no more earnest member than he. In his long cloak, worn always in the fashion of the statesmen of the earlier part of the century, he was always a picturesque figure, even distinguished in his bearing. He never forgot that he was the son of a President. Since 1887 he had suffered from paralysis and he ended his days, a pensioner of the Mexican war, in a quiet little home in the extremely easterly section of the Capitol city.

VICTORIA'S PERSONALITY.

**The Hand Which Holds the Sceptre of the
Seas the Softest of Touch.**

[Sir Edwin Arnold in the February Forum.]

The heart of gold, the will of iron, the royal temper of steel, the pride, the patriotism, and the deep piety of Victoria have been enshrined in a small but vigorous frame, the mignonette aspect of which especially strikes those who behold her for the first time in these her "chair-days." It was reported how, when Prince Albert was dying, he roused himself from a period of wandering to turn with ineffable love to his spouse and sovereign, saying to her with a kiss, "Good-by, little wife!" And when the prince consort was actually passing away, after those 21 years of wedded happiness, it was told how the Queen bent over him and whispered, "It is your little wife," at which last words the angel of death stayed his hand, while once again the dear eyes opened and the dying lips smiled.

But though this be so, no one who has been honored by near approach to her majesty, or has ever tarried in her presence, will fail to testify to the extreme majesty of her bearing, mingled always with the most perfect grace and gentleness. Her voice has, moreover, always been pleasant and musical to hear, and is so now. The hand which holds the sceptre of the seas is the softest that can be touched; the eyes which have grown dim with labors of state for England, and with too frequent tears, are the kindest that can be seen.

A JUDGE'S WITTY WIFE.

[From the Buffalo Commercial.]

A distinguished American judge has a habit which is not altogether uncommon—he frequently brings friends home to dinner quite unexpectedly. This habit is certainly hospitable, but it is not popular with wives. One court day the judge invited a number of his legal brethren to dine with him, serenely oblivious of the fact that his wife was totally unprepared for such an incursion.

The lady, however, was equal to the occasion. She did not fuss and frown and make things unpleasant all round. On the contrary, she accepted the situation with a good grace and made the best of it. The modest meal was served as promptly as possible, and though it was not a sumptuous banquet, it was at least agreeable to guests and host.

When dinner was over, just before leaving the gentlemen to their wine and cigars, the lady rose and said: "Gentlemen, I wish to say one word. You have dined today with the judge; will you do me the honor of dining tomorrow with me?" A chorus of applause greeted this speech, and next day the lady welcomed her husband's friends to a dinner worthy of such an accomplished hostess.

AN OUTLAND VOYAGE.

[From the Youth's Companion.]

The tall ships come and the tall ships go
Across the purple bay;
But there's never a ship so fair and fine,
Never a ship so brave as mine,
As mine that sailed away.

Bright in the light, and gray in the shade,
And white when the waves glow dun,
The gulls go by with their great wings
spread;
But the sails of my ship were gold and
red,
And they shone like the setting sun.

They make good cheer in the tavern here,
The sailors home from sea;
But the crew of my ship they feast with
kings,
In emerald crowns and opal rings,
And coats of the crimson hue.

Fine is the freight their ships bring in,
But mine bears finer far;
Pearls and roses, and links of gold,
Myrrh and amber, and rich bales rolled,
As bright as the morning star.

'Twas May-day morn that my ship set
sail,
With the dew on her figurehead;
Her bows were wreathed with the haw-
thorn bloom,
And she stole through the dusk of the
dawning gloom,
Like a ghost, or a bride new-wed.

The May-days dawn and the May-days
die,
And the hour draws near, I know;
The day when my ship shall come for me
To carry me back to mine own country,
East of the sun by the outmost star—
In the heart of the Long Ago.

(My mama used Wool Soap) (I wish mine had)

WOOLENS will not shrink if

WOOL SOAP

is used in the laundry. Wool Soap is delicate and refreshing for bath purposes. The best cleanser. Buy a bar at your dealer's.

VERY NOTABLE HERBARIUM.

Possibilities of Systematic Work Aptly Illustrated.

A Collection of the Wild Flowers, Trees and Shrubs Named in Gray's Manual—The Development of Seedlings Shown—A Hobby Fruitful in Valuable Results.

The following out of scientific pursuits by men whose ordinary occupation is in other channels of life is far more general than is realized by the public at large. Business and professional men frequently turn to these scientific studies as a relaxation from their usual occupation, and the fact that their work is looked upon as a recreation often enables them to give to the world results which they would not secure under other circumstances.

One of the best illustrations of the truth of this statement was met with a few evenings ago by a Boston Herald man in a pleasant residence on a quiet street in Cambridge. He had called upon Mr. Walter Deane, a gentleman whose professional occupation during the last 20 years has been in the educational line, but who has, despite the demands made upon his time and strength in his usual work, gone far toward completing a collection of the plants of the section of the United States treated in Gray's Manual. This district reaches from Canada on the north to the North Carolina line on the south, and from the Atlantic east to the 100th meridian west. He also has many specimens from the far West and from Europe. This vast territory, with its almost innumerable wild flowers, trees and shrubs, would seem to be a sufficient field for a thoroughly organized institution devoted to botany, but in some ways Mr. Deane has exhausted its possibilities, and included in his selection complete examples of certain genera which have been the object of persistent study by the most eminent botanists.

The labor incidental to making such a collection as he possesses seems almost beyond the possibilities of a man so constantly engaged as he has been for the last 20 years. His collection includes over 4000 species and varieties of plants, and its preparation has involved the poisoning, mounting and distributing of from twenty to twenty-five thousand botanical specimens, as well as the work incidental to making collections in the fields for many years.

This collection is in general arranged upon the plan followed in all botanical museums, but the neatness, care and taste shown in the arrangement of the specimens all give evidence that this has been a labor of love on the part of the gentleman who has prepared them. To those unfamiliar with such matters the ability to transform a floating weed from the oozy bed of a pond to the leaves of a collection such as this and maintain its integrity so that the smallest root and feeler is distinctly shown against the white paper and permanently fixed to it, is with difficulty understood.

Mr. Deane's particular pride in this collection is his almost complete exhibition of the genus *Carex*, within the limits of the Gray manual, including about 133 specimens and 75 varieties, all duly authenticated by Prof. L. H. Bailey of Cornell University, the well known authority in regard to this genus. He also possesses a complete fern collection of the district in which he has worked, and the whole collection had been made with a view not only to securing a single specimen of a species, but rather to show it in all its varying forms and its geographical distribution. It is very gratifying to know that Mr. Deane has been the recipient of many courtesies from the heads of the agricultural department at Washington, and if the vast resources of the government in this direction could always be as judiciously used as they have been by Mr. Deane, the public's money would be wisely expended.

With the intelligence of such men and the devotion which they show in their pursuit (even if it be in the nature of a hobby), science is advanced and the people benefited. The extended correspondence conducted by Mr. Deane in this pursuit has brought him in contact with all the leading botanists of the country, and his collection has been greatly enriched by the constant exchange of specimens through this acquaintance.

One branch of the collection has a peculiar fascination, even to those most unfamiliar with botanical subjects. This is devoted to an exhibit of some 60 species of seedlings. This line of work has occupied much of Mr. Deane's leisure during the past summer, and on individual sheets in the folios belonging to this department of his collection will be found the seedling shown in specimens from the time it first puts its head above the ground until it is fully developed in fruit or flower. These illustrations, as, indeed, all of the collection, are mounted with the greatest nicety, so that the minutest root is shown even in the smallest specimen, and the development of the species can be accurately traced throughout its entire growth.

Mr. Deane has not been content in accepting specimens which are not thoroughly authenticated, and the well known names of Gray, Watson, Bebb, Bailey, Robinson, Coulter, Rose, Davenport and the like, which are found as authorities on the descriptive cards attached to each sheet of the collection, bear evidence of the pains he has taken to insure the accuracy of his nomenclature.

As a study of cause and effect, it was quite interesting to note the neatly prepared specimens and the tools used in their preparation. The glue pot and brush might have been used by a cabinet maker in repairing large pieces of furniture, but Mr. Deane asserted that the brush and other conveniences used could not be better, and the evidence they bore of old acquaintance gave a substantial indorsement to his statement.

Mr. Deane has not confined himself entirely to the collection of botanical specimens, but has extended his hobby to include photographs of the distinguished botanists of the world as well as autograph letters from the same. His photograph collection is numbered by hundreds, and each card is indorsed with an account of its origin, by whom and where taken, and any other interesting facts calculated to add to its interest. These photographs include pictures of botanists of world-wide fame, and the indorsements show that Mr. Deane has enjoyed the acquaintance and friendship of many of the master minds of the day in the science which he loves so well. The autographs collected by Mr. Deane are worthy of especial mention, and their perusal indicates that he has enjoyed exceptional advantages in his correspondence.

It will be seen from all these facts that, while Mr. Deane has been a busy man during his life, he has made his efforts of value to himself as well as of future profit to the public.

The things they say and the things they do in the suburbs.

Reported every day in The Boston Evening Herald.

AN ILLUSTRIOUS NAME.

John Alden the 9th is living in John Alden's house at Duxbury, which was built in 1630, and in which the great John Alden lived during the latter part of his life. The ninth John Alden is in direct descent from the famous magistrate of Plymouth colony.

Boston Herald 2 Feb 1896

Jaffrey, N.H.
July 13, 1898

Dear Dr. Kennedy,

I was very glad to get
your letter from Ind. Washington
dated June 27. We were about
starting for Jaffrey. I have
heard very little of Mr. Fagin's
death except a few hurried
words from Rand whom I met
at Dr. Goodale's breakfast.

What you say about
Acrostaphylos ^{is very interesting.} alpina. Happy
thought. Make a note for
"Rhodora". I trust you can
give me a bit showing the
influence.

Well here we are settled
for the present. Mrs. Deane is
quite well and walks daily.
I have a few things in
press. Dr. Robinson & I are

making not a list of Jaffrey
plants that we have put into
The Club. Herb. He is up
here with his wife, his two
brothers and their wives,
six Robinsons together! all
very nice.

I am listing the birds of
Jaffrey at this season. They do
not differ much from those at
home, but I find Juncos, Myz.
The Blackburnian & Parula
Warblers. I have about 52 sps.

To-day for the first time it is
raining. Rain is much needed.

Give lots of love from us
to all. If you are with
Mr. Williams, tell him I got
his Postal all right.

Dr. Robinson & I have been
looking up *Lycopodium complanatum*, var. *chamaecyparissus*. He
shows me what seems to be the thing.
Thine Walter Dene.

80 Sparks St.,
Cambridge
June 7, 1899.

Dear Dr. Kennedy.

I feel as if we had drifted very far apart. I haven't heard from you for so very long. I did hope to see you at the last Club, but was disappointed. You have been reported to me of late as saying that you were now quite a man of leisure, and I am much pleased to hear it. Your very scientific paper on the new Moss shows lots of work and I thank you much for the separate.

I am happily busy as usual and we are both well. On June 1st, we moved up to the

old house to visit my sister &
brother for June. It is much
like old times, to be among
old scenes again. We do not
leave Cambridge till July.

The young woman who has managed
my plants this year has been
very sick and my work is very
much behind hand. I must
wait now till the fall to
catch up.

Give much love to each & all
and do find time to write
me a line telling how you
are &c.

Sincerely
Walter Deane

"How to know the Yarns"
Red Rand wrote me a
very funny letter. He is
brimful of humor

Though you undoubtedly
think so.

We are going to get
you & Mildred very soon
again to come here.

I was so sorry that
you didn't get in when
you came last. I
never knew it till just
now.

Very sincerely
Walter Deane

29 BREWSTER STREET,
CAMBRIDGE, MASS.

Apr. 23, /00.

Dear Dr. Kenney,

Hip! Hip! Hurrah!
 How I'm made! Here
is a grand combination
of a dinner fork and a
root digger! How useful
it will be 

Don't you see!

You see I don't take my
weight ^{of years} seriously -

It was so good of you
to think of me in so
very delightful a way

and your beautiful gift
shall be in constant
use, so that Mrs. Deane
will enjoy it as much
as I do. A thousand

thanks. I saw
Tursilago in full flower
by the roadside on
Apr. 20. I took a run
up to Williamsonstown on the
19th with Mr. & Mrs. Churchill
to look up a place for
part of the summer.
May go there in Sept.
The Tursilago always makes

me think of you, and that
pleasant day -

My good wife & Dr. &
Mrs. Corbice all gave
me books -

Mrs. Deane. Townsend's
"Narrative of a Journey
across the Rocky Mts to
the Columbia River & a
visit to the Sandwich Mts,
Chili &c. John W. Townsend
Phila. 1839." Very a
classic. Nuttall went with
him.

Dr. Corbice. From his own
Library, Prescott's "Conquest of
Mexico", 3 vols. 1st ed. 1843.
Mrs. Corbice. Purpus's (Dana)

29 BREWSTER STREET,
CAMBRIDGE, MASS.

Nov. 20 / 1901

Dear Dr. Kennedy,

Some people are fortunate
you even beyond
their deserts as I with this
class to I belong, while
to the ones that make
the fortunate ones, do you
and Mrs. Kennedy belong.
I mean it all.

Right before me hangs
the new picture of Edwin
Tayor so beautifully ex-
ecuted. It is directly over
Dr. Gray's picture and I
value it very much be-
cause you took it.

I am you well
Then the post 7/22,
that you introduced me
to Jim & me - we came
to rejoice - but I told you
I had not seen it - but
had heard it was not
and he of course meant
to get it later -

Really you are very
good to me -

Give our kindest love
to each & all -

I want to tell you
sometime about
our New York trip.

Sincerely yrs
Walter Deane

never dreaming of trouble, when suddenly
the wind blew the whole thing over
before I could take it. The camera
fell lens forward and you can
imagine my horror - I picked it up
to find that it was badly broken. I
could have cried. I expressed it off
to Roby-Trench Co. who still have it.
but it will be back in a few days
as good as new. But from June 1
when the accident happened to to say
June 12, it has been impossible to
think of photography. Smoke & rain.
Enough of this.

I have done but little collecting
here, for it is not advisable that I should
be digging up plants. Of course I have
collected & collected here, but still I should
like to get Cancer & - I have taken
Habenaria Hookeri on the same
Knuckle where I got it in the early 80s.

The birds are interesting. I have
listed in one two weeks 65 species.
Cutler, Me., was in great danger from
the fire. It is safe now - Dr. Robinson
writes "All the south side of Katahdin burned
over, Crystal bog, thirty miles long, and many
other famous collecting grounds for birds
botanists entirely destroyed."

I had a nice talk with Noel not long ago
in Harvard Square. I thank you so much for
writing - I shall send the letter to E. F. Williams.
Love to all from us both - Ever yrs
William Allen Davis

Shelburne, N. H.
J. A. C. Philbrook
June 12, 1903

Dear Dr. Kennedy,
I was overjoyed to get
your letter of May 28, written from
Lynton. I have read it again
and again and tried to imagine
that I was with you in those
beautiful places. The photos have added
inversely to my pleasure and to my
appreciation of what a beautiful spot
you are in - When I took up the
pictures I exclaimed what wonderful
work Dr. Kennedy is doing. But you
will do good work, that I know.
I have studied the pictures with my
lens following out all the details
and I have been aided by the
account of a Miss Converse who
is here and has been all over
Lynton, Lymouth & the "Lorne Dome"
country.

So you are collecting hard. I
don't wonder at it. It must be
fascinating to revel in such a
wealth of new flowers. But all yours

going to start an English Herbarium
on the plants through you
regular herbarium? I guess you have
thought of that yet - I have ^{shrub-like} much
a specimen of those plants that occur
here as naturalized or adventive.
You give me a fine list. Quite a
number occur here -

Give so much love to each and all.
Tell Mildred I am looking forward to see-
ing all her photos. Later on - I hope she
is getting real strong. Mrs. Deane joins
in love to much love to all -

We arrived here on May 26 and have
been fairly settled ever since. My cold
has practically gone and is pretty nearly
a thing of the past. The terrible drought
of which you have of course heard was here
as elsewhere. It was awful. Everything was
parched and dry, the dust inches deep on the
roads, the plants dying up everywhere
and the fine forest fire raging all over
northern New England. We had a by-line
in the woods seven miles northwest of
us, with nothing but an unbroken forest
between, and one day a fierce gale blew
steadily toward us bringing clouds that
fell everywhere - For days the smoke
lay so thick in the valley that you could
see much more than 1/2 of a mile -
Just at last the chance came, the wind moved
abruptly round to east and the blessed rain fell.

Still the damage has been vast. Besides, on
the night of May 23, a killing frost visited
this section blighting the young growth - The
strawberries are killed, and large berries
patches on the sides of the mountains shown
where the trees have suffered -

My experience in photography has been
rather unique. The light struck films
~~that~~ I told you of was due to something
in the roll itself. The next roll was quite
a success, an Eastman roll, my first being
perforated films of another make. Up here
I took a roll which came out quite well
as a whole. The question of stop exposure
is a hard one. Then I took 6 plates
as yet undeveloped. This was during
the first week here, before the smoke
came. Then on the very day when the
smoke came, I was out with Mrs. Deane
in the morning which was clear, and
the catastrophe occurred. I had ex-
posed one plate on the bridge over the
Androscoffin River looking up at the
mountains and drifting logs, with the
wind blowing quite hard. Then crossing
the river we turned off and I selected
a spot on a knoll where I thought
I could get a view of the bridge.

The camera was on the tripod and
everything was ready when I decided
that the wind was too strong. At that
moment I took my hand off the camera

We are having quite cool weather
here now. We did have some very
hot days a short time ago.

I hear from Ned Rand at in-
tervals, and I send him your
goodness lately. So he is evidently
going to write you.

Mrs. Deane joins me in
very much love to each and
all. I hope I should like to
see Edwington & North Berwick
where my grandfather lived
till he came over here.

Sincerely
Hattie Deane.

29 Brewster Street
Cambridge Mass.

July 19, 1903.

Dear Dr. Kennedy,

Again I am reminded
that you are not only wandering
pleasantly over the British
Isles, but also thinking of your
stay-at-home friends who, if not
in Norfolk County, are at least
very near it. "Shakespeare's
Garden" came only a very few
days ago and I have enjoyed
it so much. It is a very pretty
presentation of the floral side of
the great poet's works. I wish,
where it was possible, that the
authoress could have inserted the

scientific name that we might be
absolutely sure what plant is
referred to. But I suppose in
many cases that would be im-
possible & thank you so much.
The envelope was stamped "Inverness,
July 7" so you have been for
month in Scotland, having such a
good time - I long to hear
again and learn just how you
all are. Mildred, I hope, is just
as well as strong as she could
possibly be, and I should like
to hear that Mrs. Kennedy is
at least able to climb mountains
with the best of you -

Mrs. Deane & I stayed in
Fulburne till June 29 since
which time we have been
in Cambridge again - Here we

shall stay till September when we shall again
run off somewhere -
Mr. Purdie has had a rather hard
time lately, having had a operation
for epigastric hernia - He went to
the Curragh Hospital in South Dublin
and I visited him twice there -

He is out now but is not at all strong.
James has you are getting on with your
photography - The last weather in Dublin
prevents me from doing any thing; I speak
of both from London at the by & by.
James and the men at work -
I shall see them later -

Jose Churchill died here lately and examined
my Scrophulariaceae, ^{an order} which he has taken.
I spent the other evening with Ned R and
and I saw him this P.M. His ankle
has not been right and he has been
handicapped this summer. Dr. Robinson's
house is rapidly approaching completion.
It is very pretty, but I wish it had
more open land about it.

Mrs. Deane joins in much love to each
and all. We are so glad that Mrs
R. is so well and "Spatsy". She
will be entering some of these events
yet - Giving love especially to Mildred
and tell her not to forget me -
Perhaps you will have started for
home ere this reaches you.
I had a very nice letter from Fern-
and and give my love to him
if he is in London -
End night -

Mallory Deane

Sept. 6 /03.

29 Brewster Street
Cambridge Mass.

Dear Dr. Kenney,

Again thank you. Delighted
me with a real good letter and
most beautiful photos. Oh, what
a superb time you are all having.
I call you ideal travellers getting
rest and peace wherever you go
as well as seeing everything.
What a charming spot in Glas-
more. Your stories of the sports
and the Sheep Dogs have pleased
us very much, and your en-
thusiasm over Wordsworth's
country is contagious. Many
thanks for the lovely photos

a pair out you will will find
in about five minutes. Radiola.
It is a minute plant for a
pleurogonous one. Thanks -
How I shall enjoy seeing yr photos.
You are to be commended for being so
Cautious with your films. Tell Mil-
red so with my love -

We have been in Cambridge
since June 29. Weather very cool.
I have been at the Museum -
We hope to go to Wells, Me., for a
week on Sept 14 and to Shelburne
N.H. on Oct 5. Shall we meet
at the bot. club on Oct 2?
I have been persuaded to take
some more orders for the New
England list. Among them is
Lentibulariaceae. That means

Utricularia - I have made good
progress. Perhaps you'd like to see:-

Utricularia

	me.	Wt.	VT.	Mass.	R.I.	Conn.
biflora				+		+
clausenii				+	+	
clausenii			+	+		
cornuta	+	+		+	+	+
gibber	+	+		+	+	+
inflata	+	+		+	+	+
intermedia	+	+		+	+	+
minor	+			+		
purpurea	+	+		+	+	+
reppensis	+	+		+	+	+
subulata			+	+	+	
vulgaris	+	+	+	+	+	

I have examined Herbs of W. Deane, J.R. Child
New Eng Bot. Club and Gray - and I have
seen but ^(from Willoughby Lake) one sp. from VT. and that is
my own herb. In other words there
is not one sp. in the Gray Herb or
Club Herb from VT.!! I shall
write to Brainerd to send me every-
thing he has. for there are seven sp.
in the Vermont flora -

On the 10th Mrs. Deane &
I go to Shelburne for
a bit of the mountains
in autumn -

When I return I
want you to develop one
or two rolls for me
write me, that I may
do likewise - I love
the Developing Machine.

Kind love to all

Ever truly

Walter Deane

145 BRATTLE STREET.

CAMBRIDGE, MASS.

Sept. 29. /04.

Dear Dr. Kennedy,

A thousand thanks
for the pretty little
book containing your
Flora of Millington, Vt.
It is as neat & nice
as it can be and I
am delighted to have
it in covers - I
am glad you wrote
in it - Thanks -

And now fall is
here and we shall
all meet on October 7.

cathedrals & castles, and collected
some 200 species of plants.
He is very energetic -

L. H. Bailey sent me a
post card from California,
& W. W. Bailey writes from
near West Point -

We are quite well and
shall go somewhere again in
Aug. Mrs. Deane sends love to all,

We are much interested in
the peace conference - It hardly
seems to me that they can
agree - The Russians are arro-
gant and you might almost
think they had more as
much as the Japanese -
They seem to need a little more
medicine. End by

Ever Walter Deane

Friday evening. August 25/05.
29 Brewster Street
Cambridge Mass.

Dear Dr. Kenney,

Many greetings to you
and yours, each & all. Ere
you receive this, the eclipse
will have occurred and I shall
have learned from the papers
how successful it was. How
eager you must be now, and
how you are praying for good
weather. I shall think of
you all next Friday and
I earnestly trust you will
have as impressive a time
as you had before -

We have just returned from a
two weeks' ^{visit} to Grindstone beach
where we spent a week with
my sister, and to Seal Harbor
where we visited Mr. & Mrs. C. F.
Batchelder. Ted Rand was at
Seal Harbor and we saw
considerable of him. Mrs. Rand,
Grindstone beach is directly opposite
Bar Harbor and consists of a
rocky promontory covered with
~~the~~ Red & White Spruces, a
little White Pine, and con-
siderable Banksian Pine.
The latter is abundant along the
coast, but strangely has been
found in but one solitary
spot on Mt. Desert.

Dr. Thaxter has started on his
long voyage, going first to
Liverpool and then round
to Valparaiso, where he begins
his collecting, working south
and around up the eastern
coast. Just think of doing
all ~~that~~ alone. Of course
his main thought is the
Laboulbeniaceae.

I have received a very
interesting letter from Arthur
Reese written in Edinburgh.
He has been through a good
deal of Wales, Scotland
& England, having climbed
a number of mountains, visited

Cambridge Mass.
July 20, 1908 -

Dear Dr. Kennedy,

It was very refreshing to get your card from that strange place in Canada among the Tibes and the Tales, I believe you told me - Give everybody my best love and tell me sometime Hilborn's relation to her 1000th part of an Island -

Your card came Saturday, the 18th, having been written on the 16th.

Mrs. Dean & I were in Shelburne, Vt., from July 2 to 14 visiting at the McMillans on their 1000 acre place. We had a very lovely time - Of course it was hot, but the brood piazza and a fine Maxwell car were good antidotes to heat. The fire-fires we were in the midst of at times and I will tell you about them when we meet.

They were awful and it makes me
weep to see our noble forest land
going to ruin through the lum-
ber companies & the forest fires.
Whole mountain sides are swept
bare, the soil burned and then
when in your moisture converted
~~that~~ is the source of our streams?
Two houses burned down in Shelburne
village when we were up there.
Nothing but pools of water are
available in such a case.
I wonder there are so many
old wooden isolated country
houses.

Our visit to my father-in-
law's place is just off now.
to my engine ideas and
~~that~~ is very indefinite.

Do you know

How is still more
formed here at last failed / after - Dec 1st
for Laborer -

Sunday B.M. Cambridge, Mass. -
60° below - July 25, 1908.

Dear Dr. Kennedy,

If I had a better heading it would be a very plain book for Brewster & Co. No I can assure you, and yet it has been a glorious day with clear, deep blue sky after the heavy clouds. Your letter of July 22 was very welcome with all its details. I know you are very beautifully situated even if you have those "water skunks" (motor boats without mufflers) about you. If the place is "weedy" you must get the weeds. You mention some interesting native species.

At the Gray Herbarium are only Miss Day and Miss Anderson. The Manual has now for some weeks been off their hands and we must simply wait till the American Book Company will print and bind. They have every page stereotyped and ready to print from. They are very busy with the school books for the fall trade. Miss Day thinks we will get the book in September!

I have heard the proofs of the *Cypripedium*, which Miss Day sent me. I promised to keep them secret

Sends me in *Chamaenerion* seeds in B.M. -

of course as the book isn't out.
I have been making a start with
Carex. It is a job I tell you -
new species & varieties; old names
changed; species become varieties and
vice versa; old varieties absorbed
into their species, order changed
etc, etc. In the new manuscript
there are 125 species and countless
varieties. I have nearly 1700
sheets of Carex and you can
imagine the rest. I have the
advantage of having, & every
sheet in my Hb. examined,
either Bailey or Fernald or both.
I have almost every species,
and lots of a species' provenance.
My cousin keeps on post
about the same every day -
I can't please me in Cambridge.
Much love from both to
all.
Fine Weather here.

assemblage! Truly, I wish you
could have been here.

Mrs. Robinson played for us,
and Mr. Mather gave us
an illustration of bird-music.

Well, I guess bed is the
place for me. Good night
with much love to all
and so many thanks for
the delightful talk.

Sincerely
Walter Deane

29 Brewster Street
Cambridge Mass.

April 22 / 1908.

Dear Dr. Kennedy,

It was so good of
you to come out so early
this morning to con-
gratulate me for fol-
lowing faithfully in
your footsteps and to
leave me such a beautiful
talk. I want to thank

You were there, I think, I think
this morning - I shall read
the book very soon, for such
a narrative especially appeals
to me - I am so glad
that I was at home.

Yours was my first greeting -
How relative age is - Dear
me, how aged & antique

I thought sixty was when
I was in college - x x x
11 P.M. A wonderful interval!
I was writing this line to you

after dinner and, feeling pretty tired,
was thinking of going to bed when
the marvellous surprise party that
Thayer said you distributed ^{last} night came
to, came off - I was completely
fostered in every detail - Even
my pants was filled with 23
people, and I started from plain
to autumn in surprising telephone
call when I found that I had

Cambridge Oct 4 108

Dear Dr. Kennedy,

Your letter of Oct 2 came duly. I am
glad all turned out well re Indiat. Expt.

Oh, we had a glorious time Friday
evening - I did miss you - The death of
A. A. Eaton was announced - very sad -
Resolutions were offered.

Thursday said when my copy was pre-
sented to me that I was the second
to receive. For a copy had been sent
to you some time ago that you might

PLEASED Dr. & William's Friday.

use it where you were going.

Where is it? Phone her about it
to Gray Herbarium.

What a fine time you are having
to-day.. I rejoice for you.

I must let the Shakespeare
you refer to - What you say of it
is beautifully put. I shall keep it,
Will write from Shelburne.

Ever
Walter Deane

Polypodium juniperinum

Cambridge Mass

July 29, 1909.

Dear Dr. Kenney.

One or two things have come up since I just mailed a line to you -

Townsend wants to know the name of the enclosed from Andover where it grew in a bog. He says ~~that~~ the same or a closely allied species grows everywhere in the over parts of sphagnum bogs in Labrador - Of course he mustn't infer too much from an Andover specimen - Still perhaps you ~~could~~ name this fruitless bit from Andover.

In my Journ. for Aug. 14, 1908, referring to a drive Rob Rogers & I took, I said: We drove "over the western edge of Rattlesnake Hill. The Hill is 450 ft. high and we got to about 350 ft. While passing over the hill through a low second growth of hard wood we came to an old deserted house, at least, Rob says, 150 years old, and very much out of repair. The structure of the window frames and the matching of the clapboards, the same as in the Paul Revere House [at the Revere Works] shows its age. The interior was typical of such old houses. A fine breeding ran along the front of the building under the eaves. It is called the old Drake House. I took a picture of the building with Rob standing by it."

I find that I have of Hudson, W.H.
'Nature in Downland' - 'The Land's End -
'Idle Days in Patagonia' - I have not
'The Naturalist in La Plata' - It is the
'Idle Days in Patagonia' where Hudson received
the accident that changed his plans and
the result was the observations in the work.

Sincerely

- Walter Deane -

Cambridge Mass
July 29, 1899

Dear Dr. Penney,

First I had such a nice day with you three - Do tell them how much I enjoyed it. Those letters of Milred's are, I think, most unusual in being so beautifully expressed and so full of rich observation & thought. It was very good of Mrs. Kennedy to send so many of them to me.

I got home by 9.30 very comfortably. The train stopped at all stations -

I have Carex muricata from, Concord Mass
Henry D. Thoreau; Salem, Mass. ? Waring;
Dorchester, Mass. J. R. Churchill & W. Deane;
Ocean View, Va. L. F. Ward; Launceston, Eng.
W. J. Hannan.

I have Carex panicea from Cambridge, Mass
W. Oakes & W. Deane; Concord, Mass. H. D. Thoreau (1860);
Wilton, Mass. W. Deane & S. S. Kennedy (7 sheets);
W. Loring, J. R. Churchill; Providence R. I. S. I. Colver;

So I never got muricata from your place. I just thought I'd enumerate these to see what I had. My Cambr. muricata isn't in herb. yet.

Even I must go to Boston to-day to do a few errands. Take it easy & keep cool in that lovely piazza.

Yours truly
W. Deane

American Commonwealth, and
I have frequently said that
I ought to have the work.
It is a beautiful gift and
a valued reminder of our
warm friendship - Thank
you a thousand times.

I called you up a
few minutes ago to tell
you that my delight is
great and that I was,
on the point of writing.
I shall call you up
this evening. Love and well
Sincerely Walter Deane

29 Brewster Street
Cambridge Mass.

April 23, 1910.

- Tussilago Day -
- 1848  1910 -

Dear Dr. Kennedy,
Tussilago Day began in
1887, twenty three years ago,
when you & I went to
the railway cutting in
Somerville and collected
the Collofort in flower.

Each year has brought added pleasure. On ~~that~~ first occasion we took the train from Boston to Somerville; and after getting the plant we walked home to my house where you spent a while with me in my Herbarium before you returned home.

^{This} morning after breakfast we went in to Dr. H. C. Coolidge where

among other things I received your most welcome gift. Maggie had hidden it when it came and the first I knew was you very cordial letter on my breakfast table. I shall value both.

I have found the broken things they have been so much talked about fine & well preserved before the college world. I have heard them compared to Boyce's

repeat them from National
to d'Anteuil of a vice versa.

I have over 350 views of
them - I had to get a friend
to photograph Pont Mirabeau.

14 connect with the two islands.

It has been a pleasant relaxation
from other work.

I have got from Paris a most
fascinating book, 'Les Rives de la
Seine & Travers les Ages', giving the
history of the bridges with countless
illustrations of old prints.

John Churchill yesterday brought
out his violins and we spent over
six hours on them. I have a complete set
of hundreds of sheets all authenticated.
You have made me very happy.
Sincerely
Hector D.

March 14, 1912.

29 Brewster Street
Cambridge Mass.

Dear Dr. Kennedy,

What a delightful time
and surprise I had yes-

terday in anticipation

of the yearly event that
comes off next month

Your package came, as
you told me it was coming.

and I wondered what
nice choice you had made

I shall write you again about this
April 23

this time. I take lots of
fun in opening a surprise
and when I read 'The
Book of Bridges' and then
saw there were Paris bridges,
I was really astonished, first
~~that~~ you knew I had a
childish interest in this,
and then that you had
found such a book that
I had never heard of.

It is perfectly lovely, illus-
trating thirteen Paris bridges

plus Port d'Alfred above the
city where the Seine & Marne
come together.

It is so good of you
and I do love to have
such a good friend who
remembers Tussilago Day.
I have looked over carefully
the pictures and they are
certainly very attractive. I
can compare them with
my photos. I have views
of all the Paris bridges,
34 in number, and I can

walked over to Cambridge
and Mr. K. staid with us
a little while in my
Herbarium before returning
home.

Russiopsis Tarfara, L.

Railroad cutting. Somerville In flower."

I kept following up ~~that~~ plant
till I got it in every
possible stage - W.

29 Brewster Street
Cambridge Mass.

My Journal.

" April 23, 1887.

This P.M. Mr. S. S. Kennedy & I
took the 1.45 P.M. train at
the Lowell Depot in Boston
and got out at Somerville
and collected the *Colts-*
Foot where I got it
last year. It was in
good flower. We then

to miss her. I know how
you will enjoy having
her back with you.

I think I never re-
alized that the world
was so beautiful as I
did this afternoon.

Sincerely

Walter Deane

This is a stamp I have to use at will.

29 Brewster St
Cambridge

Dear Dr. Kennedy -

I have had such a
beautiful day with you
and was back home by 6.15,
less than an hour from your
station. Electric packed.
I was on the running board
at first, but got a seat at
the corner of Boylston & Mass.
Aves. You kindly say my
visit - did you, no. It
did me worlds of good in
every way. You are a model
of goodness which I hope I

can follow. I haven't had
such a delicious drive
for a long, long time.
Everything was perfect.

Your two sheets are recorded
stamped, and inserted in my
herbarium and I have made
cards for them to show they
are in my herbarium.

I shall look up the
matter of Carex Bicknellii &
Carex varia var. colacata and
will let you know.

Margaret was much interested
to hear everything.

The work I do for the herbarium
has in the last International Eng-
lishman, best, most the, New York.

Herbary to make for the
cutting sheets - they will be most
useful and I appreciate the fact
that they could not be obtained
elsewhere - I shall call them
my "cutting" sheets -
Five more to be ordered
and told her I was so sorry

We are all well excepting
Mrs. Coolidge who suffers a good
deal from a sort of neuritis
in her hands especially.
She requires much attention
and another nurse is a part
duty. She is 90 next July
and we can expect much
recovery from this trouble
I fear. It is hard
Margaret joins in much
love to all
Ever
Walter

April 22, 1912

29 Brewster Street
Cambridge Mass

Dear Dr. Kennedy,

I want a line to
reach you on my birthday
to-morrow. Only 64 years.
You will call that young.
Dr. Coolidge is 94 $\frac{1}{2}$ years.
Still each to himself.

As occasion comes, I
sit down, open 'The Book
of Bridges' and my map,
and the pictures I have of

the particular broil at
hand and read a chapter
carefully. I must tell you
it is simply fascinating.
In the review you enclosed.
The writer says, "If he is a
Frenchman ... he has acquired a
marvellous command of English.
If it is a translation, we offer
our compliments to the
translator." That is true.
It is simply delightful. And
there is so much pleasant in-

formation about the particular broil
discussed. I have been over these
so much that I think I could
go about with my eyes shut.
The colour sketches are beautiful.
My wife who has been so much
in Paris is fascinated with them.
I shall be very glad to finish the
book -

7 July
1912

Cambridge
Sunday evening

Dear Dr. Kenney,

I want to tell you
all what a real, well
time I had yesterday -
I always do. And you all
seemed so well. Give
my love to all -

but so different,

Calh. . Friday Aug 16/12

Dear Dr. Reaney -

I never had a better time
than this morning and I
only regret that it wasn't
longer. I hope you got home
all right.

I never was busier than
I have been every second
this P.M. and most of the
evening, examining, listing
and putting what I wanted
into press - I have lists
from my box 26 marsh sps.
& 2 Polygams from the
Coolidge Farm -

I will comment on a few
in any order just as they come:

Utricularia flexilis. That's it - I examined
under my compound microscope
the 1-celled Utricle. Do it.

Sagittaria latifolia, ~~forma~~ basilata.
That narrow leaved form is
not enough for forma pacifica.

Alisma Plantago-aquatica.
not Salomonis - I couldn't
think of the name

Distichlis spicata
Couldn't think of the name
First grass we picked

Spartina glabra var. pelosa

Scirpus campestris var. novae-angliae
The fine tall one - it has ray and
a dense plume-like

Cyperus ferox ^{Scales overlapping;}
^{What I thought;}
the old specimens and
Michauxianus. What I used
to get from Fresh Pond was

C. Engelmanni, scales, not
overlapping, and spikelets
sort of incurving (see figure)

Polygonum ramosissimum, var.
atlanticum. This is what I
make the tall one that I
~~thought~~ was prolificum. Large
flowers, pedicels exserted,
height 1.5 m. I think it
must be that - I shall
send some to J. R. I will
examine again the specimens
I got some time ago which
I thought were prolificum. They may be

16 Aug 1912
The two Polygonums of the
Coolidge Farm ditch are

P. pennsylvanicum

I don't think you took any.
Flowers not as many as I
am used to. A denser mesh
layer than lapathifolium
pedicels & with stipitate glands.

P. aere. var. leptostachyum

The delicate re - matches
exactly in description and
comparison my herb. specimens
It is surely an annual.
I have much of both

Sps. & var —

Well, we did have a royal
time, and so we are home.
It is always a treat to
get hold of you -

'Science' has come and
I have read a portion of
the article to Margaret
and we are extremely
interested in it. We are
now printing hers. It is
very readable and I
shall read it all
along - Thanks -

Then I can't get over your
losing another Pine.
It is a strange fate that
picked you out for 3 trees.
You certainly are immense
now for the rest of your
natural life -

Give much love to
Mildred and tell her I
regret that she has
not such a successful
time.

Yours
Walter Deane

Any way give no bother,
I hope all is well
with you —
Love to Mildred —

Sincerely
W.

Mayfair is getting over a nasty
fall on the stairs — she has been
one mass of bruises, black & blue.
aching head & body — She is
improving —

Cambridge Mass
Aug 30 /02.

Dear Dr. Kenney,
Last Tuesday, Fore Chamberlain
& I spent 3 hours on my
march and had a fine time.
I added about 15 new species.

That widely spreading grass
that we took note of, & being
quite young, and that at first
I called Panicum virgatum
is Panicum dichotomiflorum,
and has reached a wonderful
growth —

The tall Polygonum at the
further end of the marsh
I feel sure is P. ramosissimum
var atlanticum. So over Y.R.R.
I sent some to Dr. Robinson
who is a wee bit puzzled
over the long shredded stipules.
He'll pronounce later, but

The size, the exserted pedicels,
The large flowers are atlanticum.

Then I told you to take
some of that abundant
P. lapathifolium. I had
got some before and I have

just examined it again
and it is lapathifolium
with achenes 1.5 mm. broad and
peduncles obsolete glandular etc.

Now we saw that the great
mass of Polygonum as we walked
through wet stipitate plants
of achenes 2.5 mm. broad, which
is P. pennsylvanicum!! So
look at what you took.

There may have been a
small patch of lapathifolium
+ the bulk which ^I ~~is~~ ^{is}
not examine formerly
may have been pennsylvanicum!

Cambridge Sept 10/12

Dear Dr. Kennedy -

Such a lovely peaceful day.

I have A. simulatrix from
Southport, Me.

The Elms, Wells, Me.

Little Boar's Head, N.H.

Grainfree, Hancock Swamp, Mass.

Cedar Swamp, Blue Hill Reserve " E.F.W.

Ashburnham, Mass.

near Baltimore, Md.

Sapulpa, Ind. Terr.

Are these two places the same

Woodwardia areolata

Rye Beach N.H.

Henlock Band, Blue M. Res. Mass.

" Swamp, Braintree " "

Nantuxet Mass.

Pargatory, Concord, Mass.
Washington, D.C.

Van Buren Co., Mich.

I have followed our
drive on my map very well,
where we passed the road to
Green Lodge and took the next
turn past Little Wigwam Pond,
to Ellis Star, then the

Pargatory drive, then the crossing
the river. I'm not quite
sure what road we then
took to get to Carter Ave.
We could not have been far
from Reservoir Pond where
Mary Rogers took me to.
It was all too lovely.

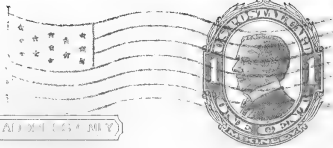

Give my kindest love
to all
Sincerely
Wells D.

Apropos of your Camp Treblecap,
Williamstown, Mass., June 22/901, Y.R.C.

I have 2 sheets from there by Y.R.C.

June 3 { 1898. Hot day -
July 27 }

The Short Story by Edw. S. Hale is
Aunt Caroline's Present! Copyright 1895.

Mr. S. G. Kennedy,
Readville,
Mass.

Cambridge, Mass.

February 5, 1913

Dear Dr. Renny,

Another red letter day!
What a delightful time and
what good and kind people
Mother & her father are!

Here — I was in
the house at 6.20, which
is good time. The Pancake
is in the package —

I don't think you had
a chance to read the
enclosed which is most

interesting. You may have
read it when Milord &
I were in northern India.

What a lot we did and
how the time does fly
at The Pines. In the
next Local Flora paper you
will see the name
"The Pines" used -

Margaret has been
so interested in my
account of the day.

Give Milord much love
and how I wish I could
see you Friday evening.

Sincerely

Walter Deane

- Cambridge -

February 13 / 913

Dear Dr. Remondy -

I have tried hard to
find ~~that~~ Whittier's quota-
tion, and lately I wrote

Mr. Samuel T. Pickard

(See Who's Who in America)

I enclose his reply -

It looks hopeless, doesn't it?

Do you know that
Dr. Wiegand, of Wellesley College
and one of our real good
Bot. Club Members, and
Curator of the Club Herb.,

has accepted a call to
Ithaca to the State
Agric. College, that is,
in some way, connected
with Cornell Univ.

Niegood will organize
the bot. dept. of several
hundred students. We
shall miss him very much.

I feel to both about
poor Scott et al. - I have
been deeply interested in the
long attempts -

Sinclair will be
with you soon

Waller Deane

nice as it could be.

Giving kind love to all.
Mildred must tell me
about the crates when I
again see her.

And send how you are
longing for the travellers
to return - They will soon
be with you. I will
send along a welcome
by the same mail as
this letter. Sincerely
Walter D.

29 Brewster Street
Cambridge Mass.

April 7, 1913.

Dear Dr. Renssler -

I want to write you
a line to tell you what
a good time we had with
you yesterday. It is always
one of my greatest pleasures
to visit you in your lovely
home and Prof. Trelease
was so glad of the opportunity
to see you again -

He was very enthusiastic.
He is a remarkably well
informed man, is he not?
I shall be much interested
to learn what he will do
next year, and when he
left the Mrs. Botanic Garden.

The recent wind-squall
set in just after we left
the Back Bay Station. It
was scarcely even raining
when we left the electric
car in Cambridge -

I hope the ladies got
to the Gardens in time,
and also found their tickets
awaiting them -

We did want to stay
on indefinitely with you,
but we felt that four hours
was quite enough of an
(I won't say) infliction
upon you, but I mean
~~that~~ we did not want to
weary you but to top
a visit. It was just as

Cambridge.

April 9, 1913.

Dear Dr. Kennedy,

How happy you all
are to see Sinclair again
and his wife. I ~~thought~~
of you about 10 o'clock
yesterday afternoon. It
was good, later, to catch
a sound of Sinclair's voice.

At the Herbarium this
morning I told Min Day,
that, when I told you, what
The Circular was bringing
in, you said you hadn't
received one. She said that

she had not meant to
send you one - I said
Then give me one and I
will send it, as you may
want, at least, as a member
of the Committee to see it.
I know they are a little
diffident about sending
these notices to the Comm.
I did not have one and
only found out by being
told over there and well
things were getting on -
So I enclose it.

It was a pity that
happy circumstances kept
you at home yesterday -
that sounds paradoxical.

We assembled at Dr. Farlow's
at 7.30 and after a
brief talk, entered the dining
room and were ranged
as follows at the table:

Lyman - Rand - Fernald.

Nash { } Farlow
Osterhout - Deane - Jeffrey - Robinson

Dr. Lyman is a Dartmouth man
doing Dr. Thaxter's work - We
had a very good time. Dr. Farlow
was full of stories all the
time. Two coils of Sinusa
borealis was lying on the
table in beautiful flower-
They were very deceptive,
but, alas, artificial - Dr. F.
thought them appropriate -

After lunch, we adjourned
to the study, and had a
meeting. Nothing of im-
portance was accomplished,
but there was discussion over
the decadence of students
in advanced botany as
well as in forestry.

I release lumber here
to-day. He will stay till
the beginning of next week.

Roland Chapter, in a letter
to me of yesterday, enclosed
two wee plants topped by one
yellow flower, green little things.
I found them not to-day.

Voyria uniflora Lam. (Gent-
ianaceae) B. W. I. & So. Amer.

Voyria mexicana occurs in Florida

See Supplement to Chapman's Flora -
I pocketed them & deposited them in the G. H. B.

Lowell 2007

THE GRAY HERBARIUM OF HARVARD UNIVERSITY

Extent of the Collection.—The Herbarium, now including more than 500,000 specimens of plants, was founded and largely developed through the untiring efforts of Dr. Asa Gray. It has for many years been the most valuable collection of its kind in America, and has contributed, through the publications of its staff, more than any other establishment to the knowledge of American plants.

Scientific Services.—It is one of the regular duties of the Herbarium staff to answer gratuitously botanical questions received, and to give an expert opinion upon the identity of plants submitted to it. In this way the Herbarium renders valuable service in the various branches of economic and applied botany, such as pharmacy, horticulture, agriculture, and forestry, since in all these branches an accurate classification of plants is of great importance.

Constant Growth of the Collection.—In order to keep abreast with the present rapid advance of botanical exploration it is necessary to add annually a large number of carefully classified specimens to the Herbarium. Each year new regions are explored botanically and important sets of specimens are sold by the collectors. These sets, including the types of many new species, must be acquired when offered for sale, if at all, since they are quickly taken up by large herbaria. Should the Gray Herbarium be unable to secure such sets of specimens, it would suffer the same irreparable loss as a library which is obliged temporarily to suspend its purchases of restricted editions.

To the Patrons of the Gray Herbarium.—For many years the Gray Herbarium was dependent upon gifts for present use to meet a considerable part of its current expenses. Without this aid, it would have been impossible to maintain the continuous growth of the Herbarium, and the undersigned express their grateful appreciation of the important assistance given in response to former circulars. The income of the Herbarium, as now endowed, assures the permanence of the establishment and covers all the regular current

expenses, but it is not sufficient to meet any extraordinary demand such as the expense of further extension and thorough fire-proofing of the present building. Nor will the present income permit the accomplishment of many promising scientific undertakings on the part of the staff both in exploration and publication, which, were further support available, could be brought to a successful completion. Even yet the Gray Herbarium is less well supported than are some similar establishments elsewhere in the United States and in other parts of the world. Under these circumstances it is believed that the patrons who in the past have so cordially helped the Herbarium in making up its deficits may feel even a greater satisfaction in contributing toward its increased growth and usefulness. The amount most frequently given by annual contributors has been ten dollars, though many persons have given larger sums.

WILLIAM ENDICOTT, JR.
Chairman.

*Gifts to the Gray Herbarium are acknowledged in the Annual Reports of the
President and the Treasurer of Harvard College.*

I had lots of pleasant greetings

Everything is about the
same here - Margaret joins
in much love to all,

Sincerely
Walter Deane.

April 24/913
29 Brewster Street
Cambridge Mass.

Dear Dr. Kennedy -

Returning home rather
late from our last Mc
Dine of the season, I found
on my table, last evening,
The Concise Oxford Dictionary.
How much pleasure and
profit I always get from
your Tussilago Day greetings.

on the shelf by me as I sit
at my desk. This dictionary
that I sit intervals reach out
for without moving. We all
need such at any moment,
It is a small School Worcester's
Dictionary with one cover
dangerously near separation
from the main body of
the volume - Had aptly
will this new book take
its place. I never had an

Cyprus Dictionary of any kind and I am
more than pleased I never see it and
thank you so much. It will be

a daily reminder of my warm friend.

I was surprised at the many warm

greetings ~~that~~ I had. At 7.10.

Sunday last evening, when the ice-

cream was packed round, I was surprised

a factory came with lighted candles,

was put in front of me -

one of my earliest botanical
correspondents - She was in
her 89th year - She just
dropped asleep -

Dear love to you and
to Mildred from us
both -

Sincerely

Walter Dean

29 Brewster Street
Cambridge Mass.

Wednesday June 11 / 13.

Dear Dr. Kennel -

Your sympathetic &
lovely letter with its
words of encouragement
to Margaret has given
her great comfort and
she is so deeply im-
pressed by the beautiful

verses that she is very
anxious to know if it
were possible to get some
copies, and who wrote
them. She thanks you
so much for writing.

Dr. Corbridge is very
sick with bronchial pneu-
monia and a weak
heart, and several times
we have thought he
was going. Last evening

he fastened us all about his
bed and gave us a last word,
and then he relaxed and went
thus knowing he is with us
still. He is a great character
on all. He is now 95 yrs. 7th mo.

I have just received a letter

from Mrs. T. D. Betts of
Manchester, N.H., telling me of the
death of my old friend Mrs. M. R. Oliver

"I thank you always with
my heart"

"God give you good night!"

I sincerely
with much love to all
from Margaret

Walter Deane

Wednesday Feb. 11/914,

29 Brewster Street
Cambridge Mass.

Dear Dr. Rensselaer -

I got home all right
by 6.30 and found Margaret
and Miss Brown awaiting me
by the parlor fire. It was
cold, but I had no trouble.
Tell Mildred that she

saved my life twice today.
What do I not owe to
her, the muff and the veil.
My face was perfectly comfortable

under the veil. Do thank
Mildred ~

How beautiful the sun
was when I departed -

The windows of your parlor
were aflood with the same color
as the sun, and it was a
beautiful good-bye to me.

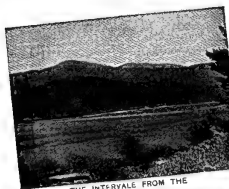

I did leave such a good
time, I do so love to see
you all. I have been
studying my dictionaries
with great interest and
they prompt me to begin
some French book very soon.

What a mine of information
they are. In the small sec-
tionary there are half-a-million
words and word-signs - See p. viii.

I cannot thank you enough
for the generous supply -

The more I think of Hal's
work, the more I am
amazed at what he has
done. He is one out of a
thousand and I stand
how proud you are -

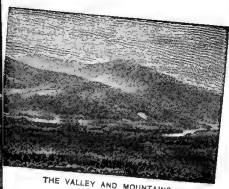

Give my kindest love to
Miss Ingham & Mildred.

THE INTERVAL FROM THE
PINE GROVE

PHILBROOK FARM

THE VALLEY AND MOUNTAINS
FROM CABOT

Monday

Sept. 7, 1914.

SHELBURNE, N. H.

Dear Dr. Kennedy -

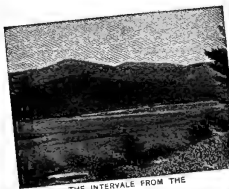

I was so glad to get your Aug. 26 letter
& to learn just how & where you all are. I
know you have had a real satisfactory time
in your lovely home and with the dear ones
coming and going. I shall be glad to
learn that Sinclair & his wife are back
here again. This awful war cannot be
far enough away from us all. We read
and discuss and we pray for peace. Prof.
Emerton, Prof. Lord of Dartmouth and Dr. Goodale
are all close by and there are a very
intelligent set of people here. One evening
Prof. Ephraim Emerton gave us a talk on
Europe from the Crimean War, to show the
many & various alliances that have been
made since then. Thinking of Japan fighting ^{on the side of} ~~with~~

the Russians so soon after their great war.
Poor Belgium. What will be left when all is
over. Then will there be destruction of relics
cathedrals, &c. too awful to think of.

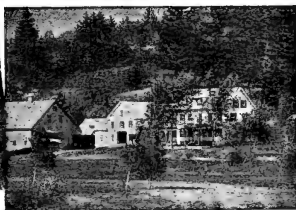

I never heard a word about Sinclair writing
a book and I am much interested, of course
I shall hear later.

Well, here we still are, and here we
remain till the end of October!
Margaret is getting a long rest. I am
so sorry that she has to rest her eyes
so long, but it can't be helped. She
does not read nor write, both great
deprivations, but she says that time
flies faster than ever. She sends so
much love to you all and of course
I do too.

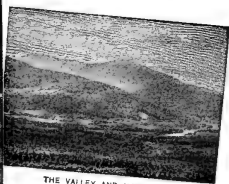

September Rhodora will be pretty late I
should judge, for D. B. L. R. is to send me
page proof of my sketch of Mrs. Owen,
and it hasn't come yet. I know that
D. B. R. has been, as usual, terribly busy

THE INTERVALLE FROM THE
PINE GROVE

PHILBROOK FARM

THE VALLEY AND MOUNTAINS
FROM CABOT

2
SHELBURNE, N. H.

every second in Jaffrey - He can hardly
 answer a letter. He's into everything -
 There have been two concerts at his house,
 eminent musicians, grand piano from Boston,
 the one some famous pianist played on it. &c.
 Then there has been a very swell fair -
 'The World in Jaffrey' - Mrs. B.L.P. is indefatigable
 These are for the benefit of the Village Im-
 provement Society, and incidentally they
 are social events - He didn't have such
 times in the 90's - more nature -

Fernald has returned with his family from
 P. E. I. 2 weeks before time, as sickness had
 set in - J. F. Collins told me this - They went
 down to her father's place outside of Providence
 and are getting nicely. J. F. C. has sent me
 post card constantly this summer - He has

been travelling much, all over New Eng., N.Y.,
N.Y., Penn., Wash., &c &c in the interest of
his plant disease work - Collins expected to have
some trips with Fernald for R. I. plants. Rand
has had his vacation at Seal Harbor and is
now settled at home again. Emile Williams
of course you hear from. He has been very
anxious about business - I don't see what he
can do. How can he import rugs, and are
rugs selling much now!

I have just collected Mentha Canadensis
and Physalis heterophylla, ~~the~~ var. ambigua -
To be sure of the purple anthers in the latter
you need fresh plants. Examine the flower
just after opening before the anther splits. For
after that the thin anther walls lose color.
It is really very interesting.
J. R. Co. has had a fine time on Lake Memphremagog.
He is home again.

Well when the spirit moves drop a line
It is always so welcome. Ever

N. D. Coe.

Shelburne, N.H.
August 22 / 1914

Dear Dr. Kennedy,

We have been separated
for at least 3 months and
where and how are you and
all the others! We came up
here to Philbrook Farm on
June 10 and here we are and
here we stay till the end of
October. We are reminiscence from
the awful war zone and it
is too terrible to speak of.
Margaret is getting a good rest,
but she is not allowed to use
her eyes this summer in
reading or writing and that is
a deprivation. Still, even if slowly,
there is improvement and we must
be thankful. She never complains
and is always bright and cheerful.
Mr. Brown is well as & that means much.

I am collecting insects for Mr. Sam Henshaw. - The bird was interesting - I have taken a bag longer than I do -
64 sp. with a very large number. I have been photographing. - Wonderful - in 5-6 weeks.

I hear from lots of my botanical
friends frequently as you do.

I have collected a good deal.
I sent 110 sheets of Panicum boreale
& Xanthophysum to Mr. Chase in
Washington and Dr. Pease who is in
Randolph added 30 more - I have
found a good station for the type
Fraxinaria officinale (poor hairy).

My great joy is a beautiful equa-
torial telescope loaned me by Prof.
Robert Williams of Harvard, power 75
diameters - It is on a stand by the
window and Mars, Venus, Jupiter and
the Moon have given us great pleasure.
My Sky-map and books help much -

We are on an elevation away from
the main house, retired & yet near.
At least 30 people at intervals ascended
to see the comets. I never asked for
this, but Prof Williams suggested it.

So write a line and say all
are well - I long to hear - We
stay indefinitely through October
much love to each and all
from Margaret & your warm friend
William Brewster

and he has lunched with
us on Tues. Wed. & Thurs. He
does want to see you &
if he hasn't already phoned
you, he will do so. I
wish you could hear him
this evening.

I dined with Emilie
et al at 6 o'clock
and must go soon - Emilie
has given us all untold
pleasure at these dinners.

I collected at Shelburne
Panicum xanthophyllum
Phytolacca heterophylla, v. *ambigua*
Poa caninum, var. *tenerum*.
Mentha Cardiac ~~re~~
Compared in well-exposed
in her eyes. Still the patient
+ had much love. ~~very~~ Walter

Cambridge Mass.
Feb 5. 1915.

Dear Dr. Kennedy -
A thousand thanks
for Class of 1864 just
received. It is so tastily
putten up and so well
arranged by the famous
Committee, since 1864!!
That is remarkable.

I have gone over the
book with great interest
and have read your
sketch. I love your
reference to The May

Herbarium and I also
love the reference, so
pretty told, to the
eclipse's you were so
fortunate to witness -

As we grow older
in years we want in
our Class Reports some
personal recollections -
I tried to do that in
a recent report of mine
(Lary and it was es-
pecially mentioned at
our dinner -

So you are 36 prots,
out of 99. We are 80+
out of 131 -

We have reached small
when our members will
drop off more frequently.

Thank you again for
the book -

I am well and
very busy on our local
flora - There is lots to
be done at the Gray Lib.
By the way the plate in
the Class Book for the
Gray Library is beautifully
done and it is a noble
beginning to the Report.
Dr. Kennedy, Graceland
has been here this week.

THE NEW YORK PUBLIC
LIBRARY
ASTOR LENOX TILDEN FOUNDATION
500 5TH AVENUE
NEW YORK, N. Y.

Apr. 18/16

Dear Dr. Kennedy -

I had such a good
time with you yesterday.
The train was 12 min.
late, but I entered my
house as the clock was
striking 6.30!

The maple sugar was
much appreciated. Tell
Miss Ingham. Margaret was
much pleased -

I am enclosing a
letter from C. E. Tappan
for your use and I
have ~~forgot~~ to run

Title, quotations in re
botany, & short sketch
of the life of John
Parsons which may
serve -

My Emerald Trees
& Shrubs is evidently
the same as yours
in the plates, &c., but
none are colored -

We read Richard III
this evening -

Yours
W.D.
